## PREFACE

The publication "This is Republika Srpska" provides all the important facts about the social and economic life in Republika Srpska and it is intended for the widest range of users.

This publication, with 28 chapters and just over 100 pages, seeks to present the complexity of statistical surveys in a simpler and more practical way.

Its aim is to make statistics more popular and to present data on Republika Srpska in a more direct and interesting way.

For that purpose, the publication has been enriched with sayings and the "Do You Know?" section with interesting facts about Republika Srpska, thus making the publication not only useful, but also appealing to readers.

As every year, this publication is published in both English and electronic editions, which makes it available to users around the world.

We invite all users to give us their suggestions and opinions, thus contributing to the improvement of this publication.

# A WORD FROM THE MANAGING EDITOR

## A JOURNEY

*What does not excite the writer won't excite the reader either.*

Pasatas

The beauty and excitement of reading, in addition to enjoying the harmony and music of words, is mostly reflected in the unexpectedness of this journey of thought. The beauty of writing, too. Thoughts allow us to travel wherever we want, to the future and to the past, to arrive in an instant, completely freely, without having to pack, without haste, documents and customs clearance. This time we will travel to Jahorina, for a reason, because we choose the most beautiful destinations. Let's travel there together, with images we create and remember. I have been to that wonderful mountain many times and each time I felt a strange excitement, certain joy in my heart and a quiet celebration of being there. This is understandable, because people most often travel to Jahorina for vacation; even when you are there for work, there is enough time left to enjoy nature and clean air. The Sarajevo valley is in fact surrounded by impressive mountains, but neither Bjelašnica, nor Igman, nor Trebević are as tame as Jahorina, which makes it the most popular. It is no wonder that the most beautiful and most visited part of Jahorina is called the Paradise Valley, as that is probably what a vision of paradise looks like, although there is no one to confirm it with certainty. Jahorina is sometimes also harsh, if you do not respect it; it is a mountain, its winters are harsh, but it is usually quite the opposite – it is sunny even in the winter, rich in both evergreen and deciduous trees. Breathing there is different and easier; put simply, a person is reborn there. Originally named Javorina, after the mountain (or Greek) maple (Serbian: javor) that it adopted as its northernmost habitat, the mountain got its current name over time and through its centuries-old pronunciation.

Jahorina spreads over the area of two municipalities of the City of Istočno Sarajevo – Trnovo and Pale. This somewhat "geographical" verb fits perfectly here, because Jahorina spreads in several directions as a beautiful and soft carpet between 43°39' and 43°47' north latitude and 18°31' and 18°43' east longitude. Perhaps these coordinates do not help the reader much to find their way, just like they did not help the folk singer who sighed and sang the now famous song *Kolika je Jahorina planina* (*What a huge mountain Jahorina is*), with its verse "Siv je soko preletjeti ne može, a kamoli dobar junak na konju..." ("A gray falcon can't fly over it, let alone a hero on a horse..."). We will not resent the fact that horses and heroes do not fly and that girls comb their hair; everything is allowed in the song, because if the verses were not good, they would not be sung even today. Many people know this song in its rock version, performed by the band *Teška industrija*. It is only right that the reader finally finds out how big Jahorina is in fact, after such an expected introduction. Jahorina is a massif of the Dinaric Mountains, about 30 km long and 15 km wide. The main part of the mountain is Gola Jahorina, a plateau 15 km long and 4-5 km wide, overgrown with thick grass in summer and covered with up to 3 metres of snow during winter. The highest peak is Ogorjelica, at 1,916 m, and it is the seventh highest peak in Republika Srpska.

## A WORD FROM THE MANAGING EDITOR

Traditionally, each chapter of this publication contains thoughts of great minds. "If there was no wind, spiders would cover the skies with their web" is a famous folk saying. Jahorina has its own wind roses, being nestled at the junction of cold continental and warm Mediterranean climates, but its skies are covered with a web of cable cars, ski lifts and gondolas, making both spiders and falcons amazed. A total of 46 km of alpine trails are covered with a single gondola, three six-seater cable cars, one two-seater cable car and three ski lifts. According to the Jahorina Olympic Centre, the capacity of these cable cars is **17,000** skiers per hour. A project is being implemented to provide transport via the most modern gondola cable car for skiers directly from Pale, 15 km away from Jahorina. In this way, the number of tourists visiting the ski resorts on Jahorina would be higher, traffic jam would decrease, while tourism in Pale would be developed rapidly and the number of guests in hotels and private accommodation facilities would increase. It should be noted that Jahorina is mere 28 km away from the international airport in Sarajevo.

The average number of days with snow cover on Jahorina is 175, from October to late May. The ten-year average height of snow cover in February is 106 cm. Jahorina now owns the most modern snowmaking system which is used to supply all ski resorts, which makes a total of **46 km** of alpine trails and **10 km** of Nordic trails. As part of this system, a large artificial lake was built at the top of the mountain, **with and accumulation and water filling of approximately 75,000 m<sup>3</sup>**, which is an outstanding construction project. In this way, skiers do not depend on natural snow and the ski season is extended. A good illustration for this claim is the fact that, on the day we are writing this text, 1 December 2020, Jahorina is the first destination in the region to open its ski season. All trails are connected by the most modern cable cars so that skiers and boarders can easily change and adapt the trails to their wishes and skills, including the youngest ones who are given the most attention as future skiers. There is also a night ski trail with new lighting, which allows for long-term enjoyment on skis.

Brian Ferry, a world-famous musician, performed at the opening of last year's ski season on Jahorina. Jahorina is becoming known not only as a ski and gastronomic centre, but also as a place of good entertainment, big concerts of the biggest music stars, music festivals and performances.

We should remind our younger readers that Jahorina is also famous for the Olympic Games held in Sarajevo in 1984, as competitions in alpine skiing for women were held on its trails. Jahorina Olympic Center is now a top ski center that has flourished in the last three years, and the potential of the mountain and the sports reputation it enjoys are really great. The Olympic beauty, as they like to call Jahorina, is an ideal place for basic training of athletes. There, for a few days, I was lucky enough to observe trainings of the Olympic and world champions, the then Yugoslav national team members Momir Petković, Ivica Frgić, Refik Memišević and Ferenc Čabo.

## A WORD FROM THE MANAGING EDITOR

They were coached by the world champion Sreten Damjanović, a coach who also coached the Olympic winner Davor Štefanek.

Being aware of the love Novak Đoković, the best tennis player in the world and one of the best athletes in the world of all time, has for skiing, one of the best skiing trails there has recently been named after him. "Jahorina is a wonderful place to rest", Novak, a world traveler, was sincerely delighted when he visited and this sentence summed up all his impressions.

Jahorina is no longer just a winter destination. Outside the ski season, classical, congress and sports tourism are also being intensively developed. Following the example of some ski centres, Jahorina traditionally hosts a very important economic forum. Not only fresh air and beautiful nature give charm to the summer season. In addition to the wellness and swimming pools of elite hotels, guest can also use many additional facilities. The lake at the top of the mountain and the beautiful lookout point can be reached by walking or by cable car, there are trim trails, mountain biking trails, outdoor gyms, and the mountain bobsled track on rails is a special attraction. The bobsled track that passes through the most beautiful parts of Jahorina in the length of 2,500 m (among the longest ones in Europe) enables visitors to travel at a speed of up to 40km/h. If one wants a little more adrenaline, there are quads, paragliding, football and basketball courts, and much more. Free in nature, during the summer there are also beautiful horses grazing in the fields, as a special attraction of Jahorina.

In addition to locals, tourists and skiers from all over the world come to Jahorina and every year the number of them increases significantly. We joyfully and wholeheartedly welcome them to Srpska. All this would not be possible without large investments and efforts of the Republika Srpska Government, which supported and financed key investments.

Winter is coming. Visit Jahorina to enjoy its beauties, sun and snow, health, rest and joys of life. What pleases the reader, pleases the author as well.

## 01 GENERAL INFORMATION

*We can put everything at stake for the homeland,  
but we must not put the homeland at stake.*

Kálmán Mikszáth

Republika Srpska was proclaimed on 9<sup>th</sup> January 1992, while as an entity within Bosnia and Herzegovina it was verified by the Dayton Peace Agreement and peace ratification in Paris, on 14<sup>th</sup> December 1995. Today, Republika Srpska is a parliamentary republic, with limited international subjectivity. The largest city in Republika Srpska is Banja Luka and it is the administrative, economic and cultural centre of Republika Srpska.

## 02 GEOGRAPHICAL AND METEOROLOGICAL DATA

*Don't knock the weather: nine-tenths of the people couldn't start a conversation if it didn't change once in a while.*

Kin Hubbard

### **Geographical location of Republika Srpska**

The latitude and longitude of the territory of Republika Srpska are between 42°33'N and 45°17'N and 16°12'E and 19°38'E respectively, that is, its territory covers northern and eastern parts of the geographical area of Bosnia and Herzegovina. The surface area of Republika Srpska is 24,641 km<sup>2</sup>.

Republika Srpska belongs to the group of continental areas – it has no access to the sea and it is located at the meeting point of two large natural geographic and socio-economic regional units – Pannonian and Mediterranean.

According to the territorial organisation, the territory of Republika Srpska consists of eight cities: Banja Luka, Istočno Sarajevo, Prijedor, Dobo, Bijeljina, Trebinje, Zvornik and Gradiška, and 56 municipalities. While other cities have no municipalities in their composition, the City of Istočno Sarajevo consists of the following municipalities: Istočna Ilidža, Istočno Novo Sarajevo, Pale, Sokolac, Istočni Stari Grad, and Trnovo. The City of Banja Luka is the largest city in Republika Srpska and the administrative, economic and cultural centre of Republika Srpska.

### **Republika Srpska is located at the intersection of vital communication links**

In terms of transport and geography, the location of Republika Srpska is of particular importance. This is especially the case when it comes to the meridional direction which, by means of the river valleys of Bosna and Neretva, while going through the Dinara mountain complex, connects Central European with Mediterranean macroregion. No less important is the zonal direction which connects Republika Srpska with the Central Balkans and Western European area. It is necessary to mention the importance of Republika Srpska's access to the river Sava, by means of which it is connected to the European Rhine – Main – Danube Canal.

### **Natural features of Republika Srpska**

Complex and curious natural features of Republika Srpska result from it being part of various natural and geographical units and their geomorphological evolution.

In the northern, Peri-Pannonian part, the hilly terrain composed of Cenozoic deposits gradually descends to the flat land with alluvial plateaus and fluvial terraces, and this is at the same time the most fertile part of Republika Srpska. There are only a few scattered mountains in this area – Kozara, Prosara, Motajica, Vučijak, Ozren and Trebovac, as well as the furthestmost northeastern slopes of Majeвица.

# GEOGRAPHICAL AND METEOROLOGICAL DATA

Towards the south, the flat land gradually turns first into the hilly terrain and then into the mountainous region which covers the largest portion of the territory of Republika Srpska. The highest mountain peak on the territory of Republika Srpska is Maglić, located at 2,386 metres above sea level, on the mountain also named Maglić.

The longest rivers in Republika Srpska are Drina (308.5 km), Sava (204.8 km) and Vrbas (131.9 km) and these belong to the Black Sea drainage basin. All smaller rivers in Republika Srpska, except those in Eastern Herzegovina, belong to the Drina and Sava river basin. All waters south of the mountain pass Čemerno, in Eastern Herzegovina, belong to the Adriatic drainage basin.

## 2.1. Geographical coordinates of the extreme points

	North geographic latitude	East geographic longitude <sup>1)</sup>	Settlement
North	45° 16' 36"	16° 56' 08"	Donja Gradina–Municipality of Kozarska Dubica
South	42° 33' 18"	18° 26' 45"	Podštirovnik – City of Trebinje
East	44° 02' 59"	19° 37' 44"	Žlijebac – Municipality of Bratunac
West	44° 56' 52"	16° 12' 18"	Srednji Bušević–Municipality of Krupa na Uni

**Natural resources** are certainly one of the key factors in the present and future development of Republika Srpska and its economic and geographical formation. In this sense, the most important natural resources are agricultural land, forest areas, hydro-climatic conditions, and mining and mineral resources.

### Climatic characteristics

Various climatic influences in force on the territory of Republika Srpska are result of the natural factors and rules of general circulation of air masses in this region. Thus, there are three climate types on the territory of Republika Srpska, and these are:

**1. Northern Peri-Pannonian region**, with its moderate continental climate. This region's climate is characterised by moderately cold winters and warm summers. Average annual air temperature ranges for this climate type are between 12°C and 19°C.

# GEOGRAPHICAL AND METEOROLOGICAL DATA

**2. Alpine and Pannonian climate**, covers the largest part of Republika Srpska. Mountain ranges are characterised by short and cool summers and cold and snowy winters, with high snow cover which persists for a long time. Average annual air temperature is between 5°C and 7°C. Hilly terrain, hollows and valleys are however characterised by a somewhat milder climate. Average annual air temperature in the areas with the Alpine and Pannonian climate is approximately 10°C. Winters are moderately cold, with snow, common temperature inversions, and fog. Summers are moderately warm.

## 3. Modified Mediterranean-Adriatic climate

The southern region of Republika Srpska, also known as lower Herzegovina, is characterised by the modified Adriatic climate. This region is called Humine, as opposed to the region called Rudine which covers higher mountainous parts of the karst of Herzegovina with a variant of both the Alpine climate and the climate of Humine. Average annual air temperature is between 14°C and 14.7°C. Trebinje, the warmest city in Republika Srpska, is located in this climatic region.

## 2.5. Annual values of major meteorological parameters and average monthly air temperatures, 2019

Measuring station	Air temperature annual average, °C	Cloudiness, tenths	Humidity, %	Insolation, hours

# GEOGRAPHICAL AND METEOROLOGICAL DATA

## Earthquakes in Republika Srpska

An earthquake occurs due to movements of tectonic plates, movements of the Earth's crust or impacts, which result in the shaking of Earth's crust caused by a powerful release of energy.

### 2.6. Earthquakes

Place (location)	Date	Hypocentre time <sup>2)</sup>	Latitude	Longitude	Magnitude <sup>3)</sup>	Intensity <sup>4)</sup>

## GEOGRAPHICAL AND METEOROLOGICAL DATA

The Balkan Region is affected both by the large lithospheric plates of Eurasia and Africa, as well as by smaller units such as the Arabian plate and the Adriatic microplate. Contrary to the widespread belief that earthquakes are rare, they occur very often, but most of them are of low intensity, occurring in relatively small areas of land or ocean floor.

### DO YOU KNOW?

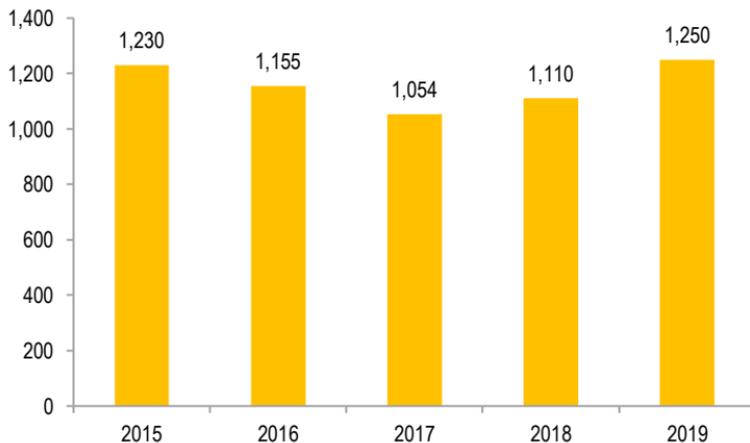

Most earthquakes occur at tectonic plate boundaries. More than half of the earthquakes happen in the Pacific Ring of Fire, while the second zone in terms of the number of earthquakes is the Mediterranean-Alpine-Himalayan area. Chile, Japan and Indonesia are most earthquake prone countries.

## 03 REGISTER OF BUSINESS ENTITIES

*A friend is someone who will for sure always count on us.*  
Valentin Kataev

Data on business entities with headquarters in the territory of Republika Srpska are obtained from the Register of Business Entities. On 1 December 2013 the Agency for Intermediacy, IT and Financial Services became responsible for the procedure of registration and classification of business entities by activity in the Register of Business Entities. Physical entities engaged in entrepreneurial activity are not entered into the Register.

In 2019, there were 1,250 newly established business entities, which represented an increase by 12.6% compared to the previous year.

Graph 3.1. Number of established business entities

Source: Agency for Intermediacy, IT and Financial Services

Based on their prevailing activity, approximately one third (28.1%) of all registered business entities are classified into the section *Wholesale and retail trade; repair of motor vehicles and motorcycles*, while one half as many (13.2%) are registered in the section *Manufacturing*.

### DO YOU KNOW?

In the registration process, the business name reservation is valid for 60 days from the moment of entry in the Register.

## 04 POPULATION

*Children and women know everyone. Men often do not know their first neighbour.*

Louis Bromfield

### Live-born children

The total number of live-born children in 2019 decreased by 3% compared to the previous year. The average age of first-time mothers in Republika Srpska is 27.8 years, which represented an increase by 0.2 years in comparison with the previous year. The average age of first-time mothers in the EU (according to the latest available data provided by Eurostat, referring to 2018) was 30.8 years. The data indicate that women postpone giving birth, thus the age of mother at birth has been increasing. The total average age of mothers at birth in Republika Srpska in 2019 was 29.3 years.

In recent years, taking into account live-born children and the five-year average, approximately 83% of children have been born in wedlock.

#### 4.1. Live-born children in Republika Srpska

## Deaths in Republika Srpska

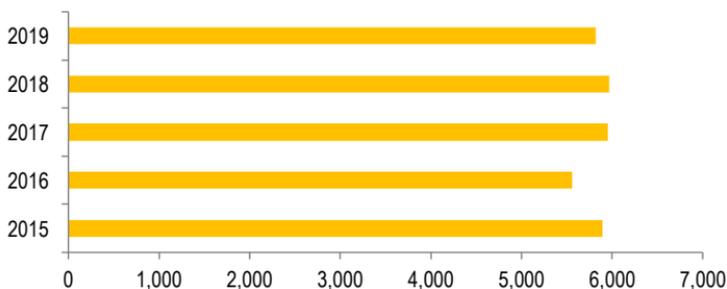

In comparison with the previous year, the total number of deceased persons in 2019 increased by 2.2%. In Republika Srpska, the average age at death is 74.5 years. On average, women live approximately six years longer than men do. More than a half of all deceased persons die due to diseases of the circulatory system, while approximately one fifth of them die due to malignant tumors. Per one thousand live-born babies, on average two babies up to one year of age decease. Republika Srpska has a low infant mortality rate when compared with the neighbouring countries; it amounted to 1.6‰ in 2019.

### 4.4. Deaths in Republika Srpska

	2015	2016	2017	2018	2019
ALL	15,054	13,970	14,663	14,763	15,081
Male	7,640	7,198	7,363	7,449	7,753
Female	7,023	7,419	6,772	7,300	7,328

## New marriages

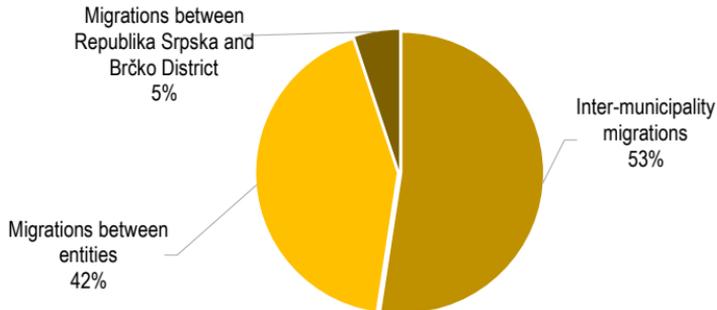

In Republika Srpska, there are approximately five new marriages per one thousand citizens. In 2019, the number of new marriages decreased by 2.4% in comparison with 2018. The oldest groom in 2019 was 90 years old, while the oldest bride was 82 years old. The youngest groom was 18 years old and the youngest bride was 16. Average age of bride at marriage was 28.9 years, while women enter into their first marriage at the average age of 27.2 years. Average age of men at marriage was 32.1 years and grooms enter their first marriage at the average age of 30.2.

Graph 4.2. New marriages

## Migrations in Republika Srpska

The largest population movements in Republika Srpska were recorded in the age group of 20 to 34 years. When it comes to this age group, women opt for moving more often than men. In the age group of 35 years and older, participation of men in migration is higher than that of women.

Graph 4.3. Internal migrations  
(immigration/emigration) in Republika Srpska, 2019

## DO YOU KNOW?

The infant mortality rate in Republika Srpska in 2019 was lower than the infant mortality rate in the EU-28. In 2019, the infant mortality rate was 1.6‰. According to the latest available data provided by Eurostat, referring to 2018, the infant mortality rate in the EU-28 was 3.5‰. This low infant mortality rate is positively affected by favourable endogenous factors (genetic factors, physique, etc.), as well as by exogenous or environmental factors, such as appropriate health care and health education of both pregnant women and new mothers.

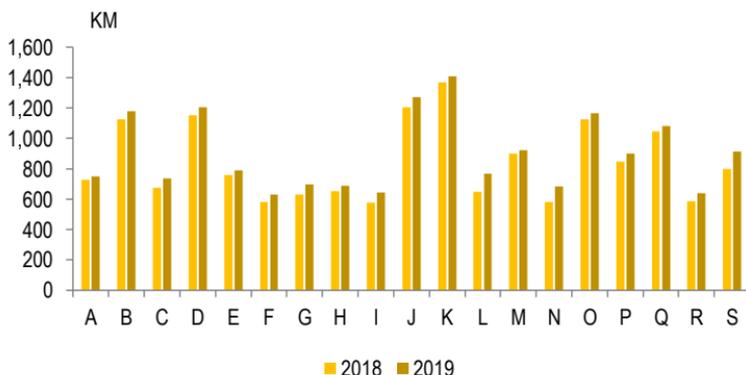

## 05 WAGES

*I let no one peek into my purse nor into my soul.*

Giovanni Boccaccio

### Increase in average after-tax (net) wage in 2018 compared to the previous year

The average after-tax (net) wage in 2019 amounted to 906 KM, namely 49 KM more than in 2018. Nominally, the average after-tax (net) wage increased by 5.8%. An increase was recorded in all 19 sections, with the highest increase being recorded in the sections *Real estate activities* with 18.9% and *Administrative and support service activities* with 17.1%.

Graph 5.1. Average after-tax (net) wages by section of activity classification

Real index of average after-tax (net) wage, which represents the ratio between the nominal index of average after-tax (net) wage and the consumer price index in the given period, increased as well. Thus, compared to 2018, the average after-tax (net) wage in 2019 in Republika Srpska increased in real terms by 5.3%.

The situation in the neighbouring countries is similar. In Slovenia, the average net wage increased in real terms by 2.1%, in Croatia by 2.6%, and in Serbia it increased by as much as 8.5%. In Montenegro, the average net wage in 2019 was really 0.4% higher compared to 2018. In the Federation of BiH, the average net wage increased in real terms by 3.8%.

## WAGES

In the past five years, the average net wage increased by 9.0%. The highest wage was still that of those employed in the section *Financial and insurance activities*, in which every second employee has completed a higher education school or has a university degree. They accounted for 2.1% of the total number of employed persons in 2019 and they received on average 1,409 KM per month. In 2019, the lowest monthly after-tax (net) wage (630 KM) was earned by those employed in the section *Construction*, which employs 4.6% of the total number of employed persons. In this section, majority of employed persons, approximately 44% of them, completed secondary school.

### DO YOU KNOW?

The highest increase in average after-tax (net) wage in the five-year period was recorded in the section *Other service activities*, by 218 KM.

### 5.1. Average after-tax (net) wages by section of activity classification

## 06 LABOUR MARKET

*Every time I appoint someone to a vacant position,  
I make a hundred unhappy and one ungrateful.*

Louis XIV

In 2019, labour market in Republika Srpska kept recovering from negative effects of the global economic crisis. The decreasing unemployment rate is one of the main indicators of the recovering labour market. The unemployment rate has been decreasing gradually since 2015, while in 2019 it decreased significantly, namely by 5.5 percentage points, in comparison with the previous year

By sex, female unemployment rate in 2019 was 3.8 percentage points lower than in the previous year, while male unemployment rate decreased by 6.8 percentage points.

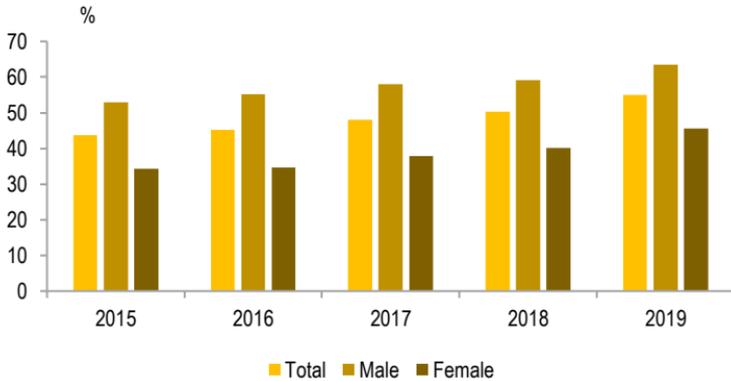

### 6.1. Unemployment rates

	2015	2016	2017	2018	2019
TOTAL	25.2	24.8	21.0	17.2	11.7
Male	23.4	21.6	18.0	16.3	9.5
Female	27.7	29.5	25.1	18.5	14.7

The structure of employed persons by group of sections of economic activity in 2019 was as follows: agricultural 29.8%, industrial (non-agricultural) 27.1% and services 43.1%. By type of employment, the structure was as follows: employed persons working for a wage (employees) 65.1%, self-employed persons 29.6% and unpaid supporting family members 5.3%. By educational attainment, most employed persons completed secondary school 65.8%.

Developed countries are characterised by a dominant share of those employed in the services sector, as well as high participation of those working for a wage in total employment.

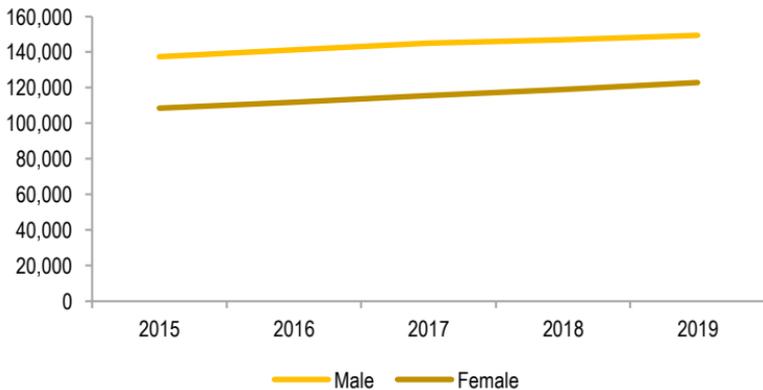

# LABOUR MARKET

Graph 6.1. Employment rates (15–64 years of age)

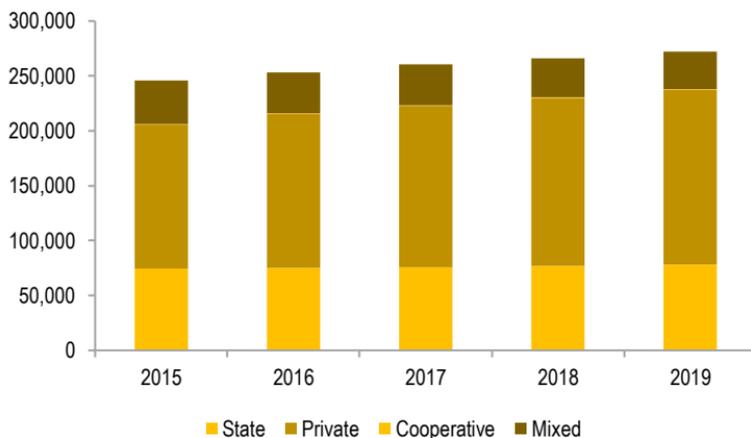

## DO YOU KNOW?

The employment rate of male population was 15.8 percentage points higher than that of female population.

Graph 6.2. Employed persons by sex, annual average

# LABOUR MARKET

Graph 6.3. Employed persons by type of ownership

Private sector has the highest number of employed persons. Every second employed person works in business entities in private ownership, while every sixth is an entrepreneur or works for an entrepreneur.

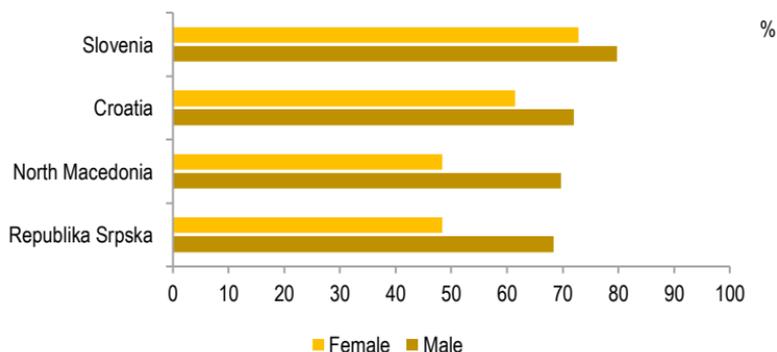

Half of all employed persons in Republika Srpska work in *Manufacturing, Trade and Public Administration*. Every second employed person has completed secondary education, and every fourth has completed a higher education school or has a university degree.

Every sixth employed person is under 30 years of age, while one in four employed persons is older than 50.

## 08 GROSS FIXED CAPITAL FORMATION

*If everyone does as much as they are capable of, the nation will not perish.*

Vuk Karadžić

In Republika Srpska in 2019, gross fixed capital formation in fixed assets amounted to 1,789,555,000 KM. The most significant share in the structure of gross fixed capital formation by activity of investor, with 17.7%, was that of the section *Public administration and defence; compulsory social security*.

As in the previous year, a significant increasing trend in gross fixed capital formation was continued in the section *Real estate activities*, namely by 146.0%, as well as in the section *Human health and social work activities*, in which an increase by 37.1% was recorded. A large increase in gross fixed capital formation was recorded in the section *Arts, entertainment and recreation*, in which the index was higher than 300.

### 8.1. Gross fixed capital formation in fixed assets by activity of investor, 2019

	Value of gross fixed capital formation, thous. KM	Structure, %
Total gross fixed capital formation	1,789,555	100.0
Agriculture, forestry and fishing	46,249	2.6
Mining and quarrying	23,652	1.3
Manufacturing	301,769	16.9
Electricity, gas, steam and air-conditioning supply	213,829	11.9
Water supply; sewerage, waste management and remediation activities	14,816	0.8
Construction	175,936	9.8
Wholesale and retail trade; repair of motor vehicles and motorcycles	154,783	8.7
Transportation and storage	45,711	2.6
Accommodation and food service activities	17,326	1.0
Information and communication	115,678	6.5
Financial and insurance activities	44,401	2.5
Real estate activities	123,408	6.9
Professional, scientific and technical activities	11,256	0.6
Administrative and support service activities	9,063	0.5
Public administration and defence; compulsory social security	316,802	17.7
Education	18,915	1.1
Human health and social work activities	116,777	6.5
Arts, entertainment and recreation	34,849	1.9
Other service activities	4,335	0.2

<sup>1)</sup>The calculation of gross fixed capital formation in fixed assets is based on the ESA 2010.

## GROSS FIXED CAPITAL FORMATION

By activity of investor, the highest shares in the structure of gross fixed capital formation were those of the following sections: *Public administration and defence; compulsory social security, Manufacturing and Electricity, gas, steam and air-conditioning supply*. By purpose of gross fixed capital formation in new fixed assets, the highest shares referred to the sections *Construction, Manufacturing and Human health and social work activities*.

### Nearly one billion KM invested in buildings and other structures

By its technical composition, more than half of the total gross fixed capital formation was invested in buildings and other structures. In 2019, the highest gross fixed capital formation in construction structures was that of business entities from the sections *Public administration and defence; compulsory social security* (26.0%), *Construction* (12.5%) and *Real estate activities* (12.5%).

The highest gross fixed capital formation in machinery, equipment and transport equipment was that of business entities from the section *Manufacturing* (25.8%).

When it comes to gross fixed capital formation in non-monetary (intangible) fixed assets, the section *Financial and insurance activities* had a share of 20.5%, the section *Information and communication participated* with 15.0% and *Agriculture, forestry and fishing* with 13.8%.

### 8.2. Structure of gross fixed capital formation in fixed assets by technical composition

	2015	2016	2017	2018	2019
Gross fixed capital formation	100.0	100.0	100.0	100.0	100.0
Buildings and other structures	52.0	51.2	49.7	54.1	54.9
Machinery, equipment and transport equipment	41.9	43.2	44.0	40.9	40.3
Other	6.1	5.6	6.3	5.0	4.8

Gross fixed capital formation in 2019 was mostly financed from own financial assets (49.7%), followed by financial loans (24.0%), assets of budgets and funds (9.3%), joint assets (7.7%), other sources (7.7%), and financial leasing (1.6%)

## 10 STRUCTURAL BUSINESS STATISTICS

*It is better dealing with men in appetite,  
than with those that are where they would be.*

Francis Bacon

**Information and communication was the most productive section of economic activities in 2018, while Real estate activities was the most profitable one**

Average profitability rate, as a measure of the share of gross operating surplus in turnover, amounted to 14.2% in Republika Srpska.

By business operations in 2018, the section *Information and communication* can be singled out as one of the most successful sections of activity in the economy of Republika Srpska. With 305 enterprises and 97 entrepreneurs, as well as 6,140 employed persons, this section has a share of over 7.5% in the total value added. It also realises the highest labour productivity with 66,598 KM, and its labour costs of 24,768 KM per employed person and profitability rate of 34.7% are high.

### 10.1. Indicators of success of non-financial business economy

	Turnover per person employed	Value added per person employed (productivity)	Labour costs per person employed	Gross operating surplus per person employed
TOTAL	115,039	29,083	14,086	16,342
Industrial activities	97,610	29,276	15,294	14,381
Construction	113,661	34,313	11,896	23,092
Trade	211,003	27,040	12,172	16,572
Non-financial service activities	62,350	29,230	14,293	17,306

Market business entities (enterprises and entrepreneurs) in the sections of industry employ over 40.6% of all employed persons, while they also provide the greatest contribution to the formation of total value added at factor costs, approximately 40.8%, which in 2018 amounted to over 5.4 billion KM in total.

Trade generates the highest turnover of all the economic activities in Republika Srpska, accounting for approximately half of total turnover, but it has the lowest profitability rate. One third of all business entities operate in the trade sector which employs one quarter of the total number of employed persons.

The lowest number of business entities, namely 60 enterprises and 88 entrepreneurs, operates in the section *Arts, entertainment and recreation*, but these business entities achieve significant labour productivity (38,091 KM) and profitability rate (38.9%).

# STRUCTURAL BUSINESS STATISTICS

## DO YOU KNOW?

The highest-paid employees are those employed in enterprises engaged in electricity, gas, steam and air-conditioning supply.

## 10.2. Indicators of business activities of non-financial business economy, structures

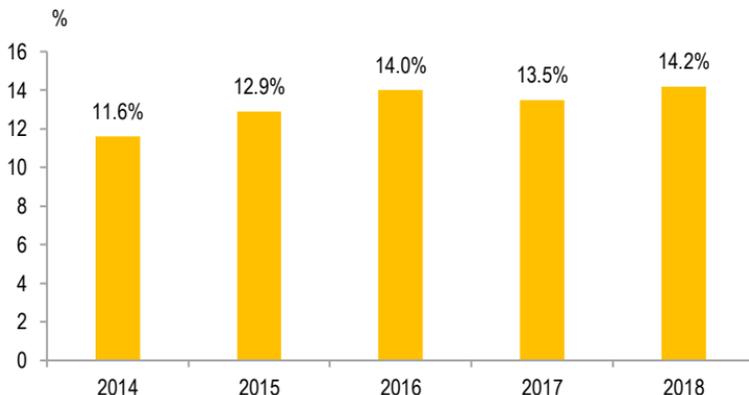

%

	Number of business entities	Number of employed persons	Turnover	Value added at factor costs	Gross operating surplus
TOTAL	100.0	100.0	100.0	100.0	100.0

Goods and services in the sample of consumer prices are selected based on the average household consumption and are grouped into 12 main categories according to the Classification of Individual Consumption by Purpose (COICOP).

## 12 AGRICULTURE

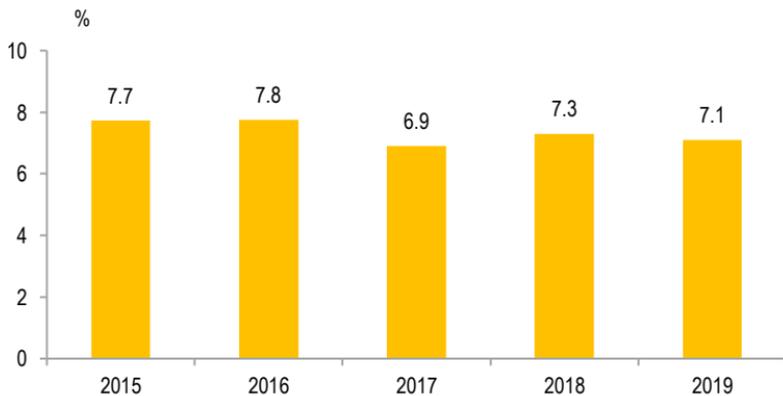

*Life is so boring when there is no struggle.*

Mikhail Lermontov

### Share of agriculture in the GDP formation was 7.1%

In 2019, the share of agricultural Gross value added in the formation of Gross domestic product of Republika Srpska was 7.1%, which represented a decrease by 0.2% compared to the share realised in the previous year.

With the share of 9.8% in the Gross domestic product formation, agroindustry<sup>1)</sup> (production and processing of agricultural products) represents one of the most significant areas of the economy in Republika Srpska.

Graph 12.1. Share of agriculture in the structure of GDP

---

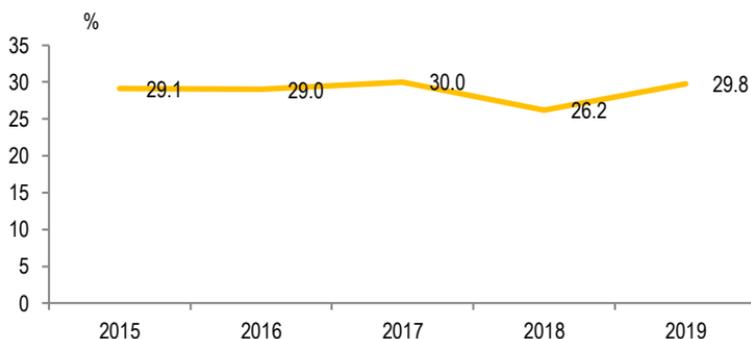

<sup>1)</sup>Section A division 01 and section C divisions 10, 11 and 12 of the Classification of Economic Activities based on NACE Rev.2.

# AGRICULTURE

## Primary agriculture employs 29.8% of all employed persons

According to the data obtained through the Labour Force Survey in 2019, there were 104 thousand persons employed in agriculture, which represented an increase by 8.2% compared to the previous year. The number of persons employed in agriculture accounts for 29.8% of the total number of employed persons, or 12.6% of the total working-age population.

Of the total number of persons employed in agriculture, 77.9% were full-time employees, while the remaining 22.1% were part-time employees. The average weekly working hours in agriculture in 2019 amounted to 40.3 hours, namely 42.1 hours for men and 38.2 hours for women employed in agriculture

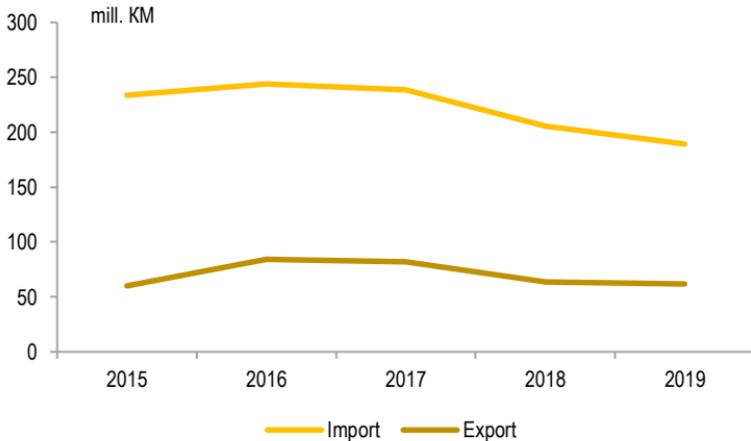

Graph 12.2. Share of persons employed in agricultural activities

## Value of realised external trade of agricultural products was 251.2 million KM

The value of total external trade of agricultural products in 2019 amounted to 251.2 million KM, which represented a decrease by 6.7% or 17.9 million KM in comparison with the previous year.

Total value of import of agricultural products in 2019 amounted to 189.2 million KM, which represented a decrease by 8.0% or 16.4 million KM compared to the import realised in the previous year. During the same period, total value of export of agricultural products was 62.0 million KM, which represented a decrease by 2.4% or 1.5 million KM compared to the previous year.

# AGRICULTURE

Graph 12.3. Value of realised annual import and export

The share of agricultural products in total export of Republika Srpska realised in 2019 was 1.7%, while in total import these products participated with 4.0%. The coverage of import with export amounted to 32.7%, which represented an increase by 1.9% compared to the coverage recorded in the previous year.

## Production of milk 258.5 million litres

In 2019, family farms in Republika Srpska produced 258.5 million litres of milk, which represented a decrease by 6.8% compared to the previous year. Of the total amount, production of cow's milk accounted for 98.2%, production of goat's milk for 1.4%, while production of ewe's milk accounted for mere 0.4% of the total production.

Total value of production of milk in 2019 was approximately 189 million KM, which accounted for 11.0% of the total agricultural gross product.

Of the total amount of milk produced in Republika Srpska in 2019, dairies purchased 45.8% or 118.4 million litres of milk at an average price of 0.57 KM per litre.

The total production of cow's milk of 254 million litres was achieved by milking 89.4 thousand dairy cows and through the average milk yield of 2,840 litres of milk per cow.

# AGRICULTURE

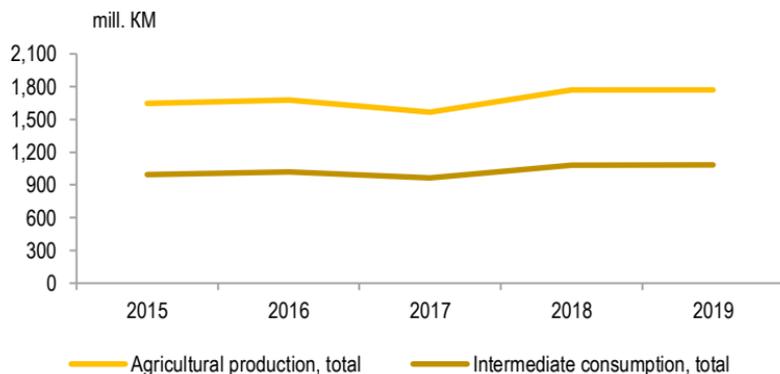

## DO YOU KNOW?

In 2019, family farms in Republika Srpska produced 385 million table eggs, or 337 pieces per capita.

### Value of agricultural production in 2019 amounted to 1.8 billion KM

The value of total agricultural production in 2019 amounted to 1.8 billion KM, which represented an increase by mere 0.1% compared to the previous year.

During the same period, the total value of intermediate consumption<sup>2)</sup> amounted to approximately 1.1 billion KM, which also represented an increase by 0.1%. Intermediate consumption in agriculture in 2019 accounted for 61.2% of the value of agricultural production.

Graph 12.4. Value of total agricultural production and intermediate consumption

<sup>2)</sup> Intermediate consumption in agriculture is the value of consumed raw materials and services (input) in agriculture in performing agricultural production. It is presented at purchase prices.

*Hard wood sharpens the axe.*

Giuseppe Garibaldi

Republika Srpska is one of the few European regions where forests are predominantly natural, belonging to different biogeographical regions and being adapted to different natural conditions. The Adriatic Sea in the south, high mountains in the central part and fertile plains in the north have a favourable effect on the diversity of forest communities and on a significantly higher average annual growth in comparison with the surroundings. In Republika Srpska, the average annual increase of timber in high forests with natural regeneration amounts to 8.0 m<sup>3</sup>/ha (state forests). Of the total surface area of Republika Srpska, approximately 50% are areas covered with forests, which is approximately 0.75 ha per capita. Approximately one million hectares of forests and forest lands are in state ownership, while private forests cover approximately 20% of the total forest area in Republika Srpska.

The forests of Republika Srpska are managed by applying all the principles of long-term forest exploitation for the purpose of present and future fulfillment of appropriate environmental, social and social functions of forests at the local, national and global levels.

All forests in Republika Srpska are covered by the FSC (*The Forest Stewardship Council*™ – FSC) international certificate. The objective of the FSC programme is to promote environmentally appropriate, socially beneficial and economically viable management of the world's forests, by establishing general standards that will be recognised and respected through the principles of sustainable forest management. In Republika Srpska, forests are a major element of national parks, nature parks and hunting areas (hunting grounds).

**13.1. Forest exploitation**

	Gross felled timber			Broadleaves	Conifers
	total	state forests	private forests		
2015	3,274	2,913	362	1,763	1,511
2016	3,368	2,921	436	1,802	1,555
2017	3,259	2,782	477	1,856	1,403
2018	3,224	2,743	480	1,792	1,433
2019	3,072	2,628	444	1,738	1,334

thous. m<sup>3</sup>

# FORESTRY

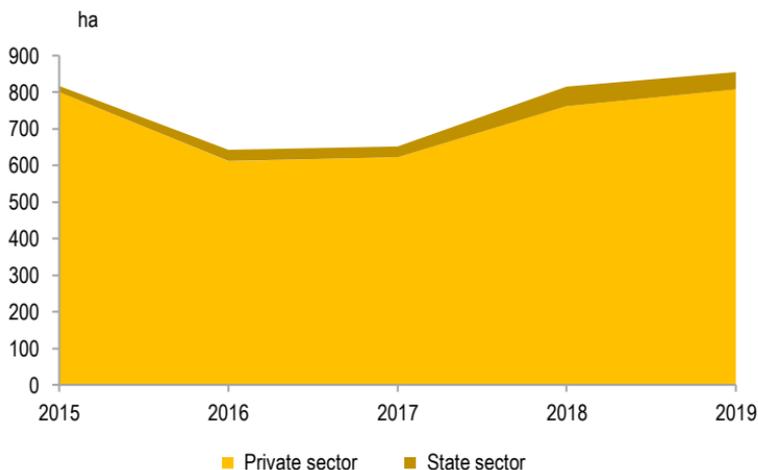

Average gross felled timber in the forest and outside the forest in 2019 decreased in comparison with 2018 and it amounted to approximately three million m<sup>3</sup>. Out of this sum, approximately 2.6 million m<sup>3</sup> belongs to the state sector, which is significantly more than in the private sector, as the state sector covers 85.5% of the total felled timber.

## 13.2. Production and sale of forest assortments in state forests

	2015	2016	2017	2018	2019

# FORESTRY

Graph 13.2. Forest area and forest land affected by fire

Damage caused by fire in 2019 were recorded over an area of 1,958 ha, with 13,204 m<sup>3</sup>, which represented a significant increase in comparison with the previous year.

## DO YOU KNOW?

Forest air is rich in essential oils that destroy microbes. In a year, one hectare of coniferous forest emits into the atmosphere approximately 30 kg of substances with bactericidal action, which is enough to disinfect a small town.

According to this calculation, in 2019, forests of pure coniferous stands in Republika Srpska emitted about 1.1 t of bactericidal substances into the atmosphere.

*We tend to underestimate what we have and overestimate what we are.*

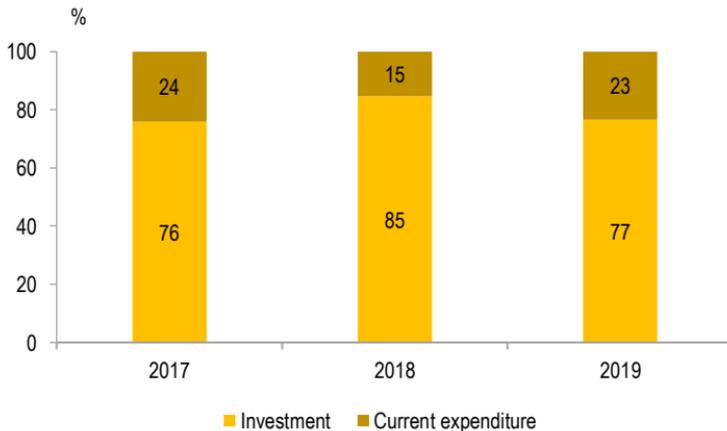

Honoré de Mirabeau

## Outlays for environmental protection

In 2019, industrial enterprises allocated almost 60 million KM for environmental protection, of which 77% referred to investment and the remaining 23% to current expenditure.

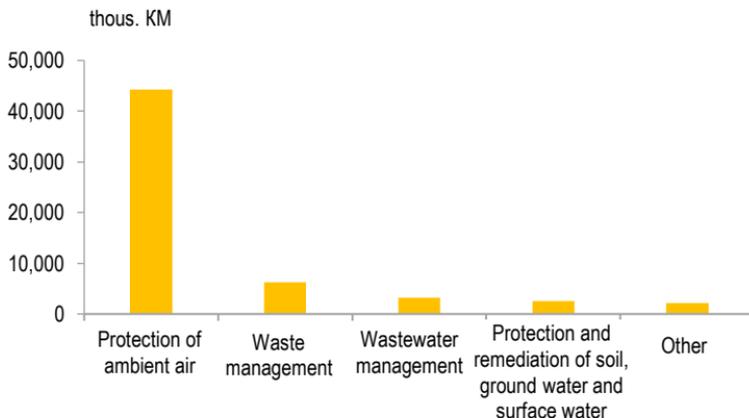

Over 90% of environmental protection investment was realised in the area of protection of ambient air. When it comes to current expenditure, the highest percentage was allocated for waste disposal, namely 45%, followed by wastewater management expenditure with 19% and protection of ambient air with 17%.

The proportion of environmental protection investment and current environmental protection expenditure in industry did not change significantly in the period 2017-2019. During this period, the share of environmental protection investment ranged between 76% and 85%, while current environmental protection expenditure accounted for 15% to 24% of the total environmental protection expenditure.

Graph 14.1. Structure of environmental protection expenditure in industry

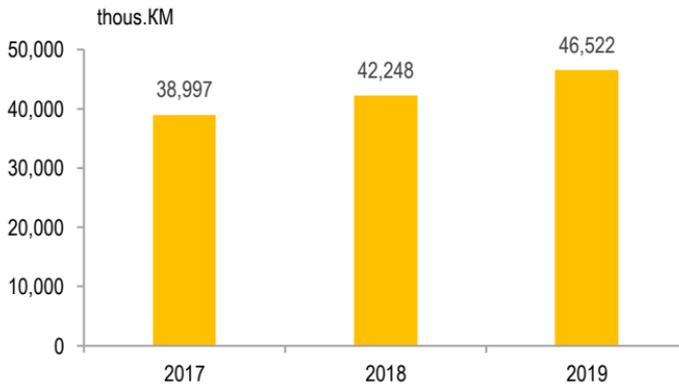

# ENVIRONMENT

Graph 14.2. Industry costs by classes of environmental protection, 2019

While industrial enterprises mainly invested in environmental protection, enterprises in the field of waste collection spent the most on ongoing maintenance of assets and gross wages of employees. In this activity, 78% of total expenditures in 2019 referred to internal current expenditure, while only 3% referred to investment. The remaining 19% was paid to other entities for environmental protection services, most often for waste disposal in regional waste disposal sites. This proportion of investment and current expenditure almost did not change in the period 2017-2019. During this period, these enterprises collected 10% more waste, with an increase by 19% in generated revenues.

## ENVIRONMENT

Graph 14.3. Revenues of enterprises from the collection of municipal waste, 2019

### DO YOU KNOW?

In 2019, industrial enterprises in Republika Srpska generated over seven billion KM in savings, as revenue from activities related to environmental protection.

## 15 INDUSTRY

*If you do not have what you love, you have to love what you have.*  
Emile Zola

### Industrial production decreased by 11.4% in 2019 compared to 2018

Industrial production has been increasing in the last five years. However, in 2019, a decrease by 11.4% was recorded in comparison with 2018.

Even though in 2019 a decrease was recorded in comparison with 2018, the most significant divisions of industrial production were *Electricity, gas, steam and air-conditioning supply, Manufacture of food products, Manufacture of fabricated metal products, except machinery and equipment, Manufacture of wood and of products of wood and cork, except furniture; manufacture of articles of straw and plaiting materials, and Manufacture of basic metals.*

#### 15.1. Indices of industrial production by section of activity classification

### Industry had a share of 18.6% in the total Gross domestic product of Republika Srpska

Gross fixed capital formation in new fixed assets in industrial activities in 2019 amounted to 488 million KM, which represented a decrease by 16.0% compared to 2018.

## INDUSTRY

Gross value added of industrial activities in 2019 increased by 1.6% in comparison with 2018, totaling 2.1 million KM, with *Manufacturing* having the highest share (63.5%).

At the end of 2019, there were 4,926 registered industrial enterprises, of which 90.1% in private ownership.

### DO YOU KNOW?

Of the total number of industrial enterprises in Republika Srpska, 89.9% are engaged in manufacturing.

In 2019, there were new 164 business entities that were recorded into the Register of Business Entities and classified into industrial activities.

Most industrial enterprises, namely 89.9% of them, were engaged in *Manufacturing*, while 4.6% were engaged in *Electricity, gas, steam and air-conditioning supply*, 4.0% in *Mining and quarrying*, and 1.5% in *Materials recovery*.

Industrial enterprises employ 27.6% of the total number of employed persons in Republika Srpska; these enterprises employ 63,743 workers, of which 77.9% in *Manufacturing*.

According to reports of industrial enterprises, value of sale of industrial products in 2019 amounted to 5.4 billion KM, with products of *Manufacturing* accounting for 69.9% of the total value. Value of sale of industrial products decreased by 9.9% in 2019 in comparison with 2018.

Five industrial divisions generate 61.5% of the total value of sale of industrial products, namely: *Electricity, gas, steam and air conditioning supply* 24.6%, *Manufacture of food products* 14.7%, *Manufacture of fabricated metal products, except machinery and equipment* 10.1%, *Manufacture of wood and of products of wood and cork, except furniture; manufacture of articles of straw and plaiting materials* 8.1% and *Manufacture of basic metals* 4.1%.

## Export of industrial enterprises accounted for 41.7% of the total value of sale

Export realised by industrial enterprises in 2019 amounted to 2.2 billion KM, of which 88.4% was realised in *Manufacturing*.

Graph 15.1. Industrial divisions with the highest shares of export in the total export of industrial enterprises, 2019

## 16 ENERGY

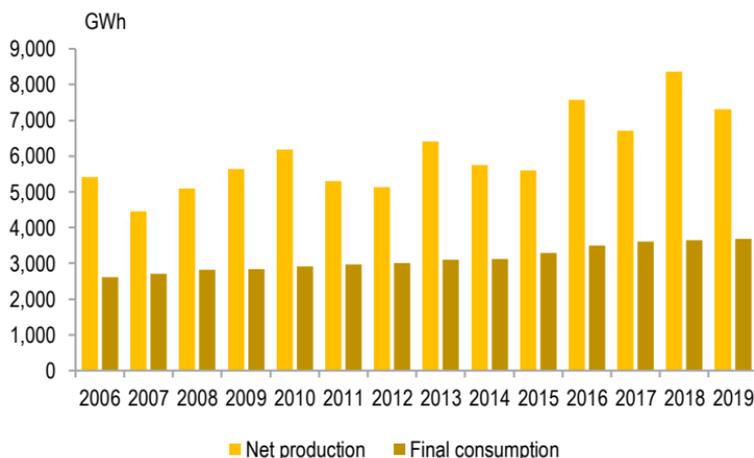

*Mothers give our spirit warmth and fathers light.*

Pearl Buck

Electricity consumption in Republika Srpska is fully covered by production in domestic power plants, with surplus being exported to other markets. Supply security is high, given that domestic primary energy sources are used.

Total net production of electricity in 2019 amounted to 7,303 GWh. In the structure of total net production, thermal power stations participated with 69.6%, hydro power plants with 29.4%, and other producers with 1.0%.

In recent years, there has been a steady rise in final consumption of electricity.

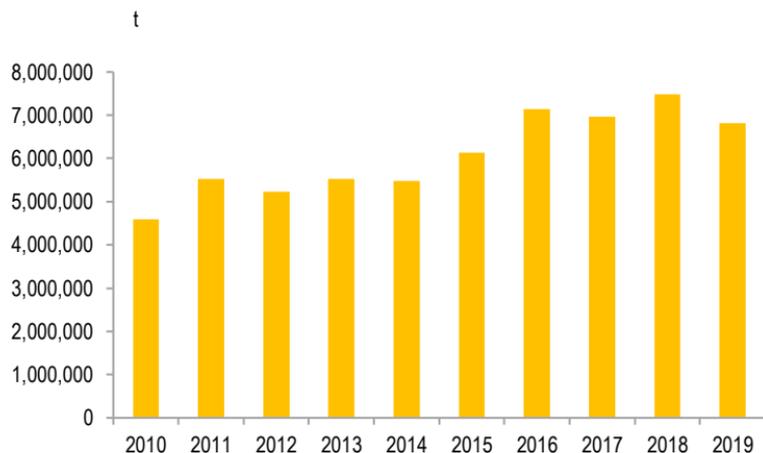

Graph 16.1. Net production and final consumption of electricity

### **An increase in coal consumption in industry**

Of the total available amount of coal in Republika Srpska, approximately 95% was consumed for production of energy, while the rest was used in mass consumption.

The largest consumer of coal in final consumption was industry, with a share of 67.9%. In the last three years, there has been an increase in coal consumption in industry.

Graph 16.2. Production of coal

Since Republika Srpska does not have its own sources of natural gas, all the necessary amounts are imported. In final consumption of natural gas, the highest share is that of industry, namely 91.7%, while the remaining 8.3% is consumed by households, transport and other consumers.

#### **Increase in production of heat from biomass**

Production of heat from biomass has been increasing constantly and its share in total production of heat in 2019 was 67.2%.

#### **DO YOU KNOW?**

The amount of heat produced from biomass in 2019 was almost six times higher than five years ago.

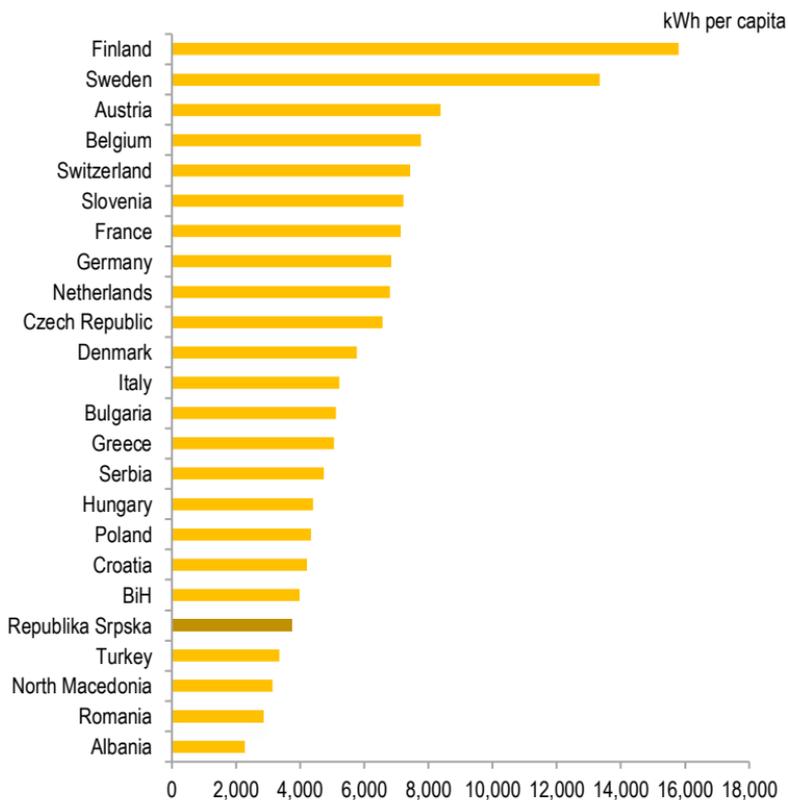

# ENERGY

# ENERGY

Graph 16.3. Electricity consumption per capita, 2018 (IEA)

## ENERGY

### **In 2019, approximately 230 million KM was invested in the energy sector**

Gross fixed capital formation in new fixed assets in the energy sector (divisions 5, 19 and 35) amounted to approximately 230 million KM, which accounted for 12.7% of the total financing of gross fixed capital formation in new fixed assets in Republika Srpska in 2019.

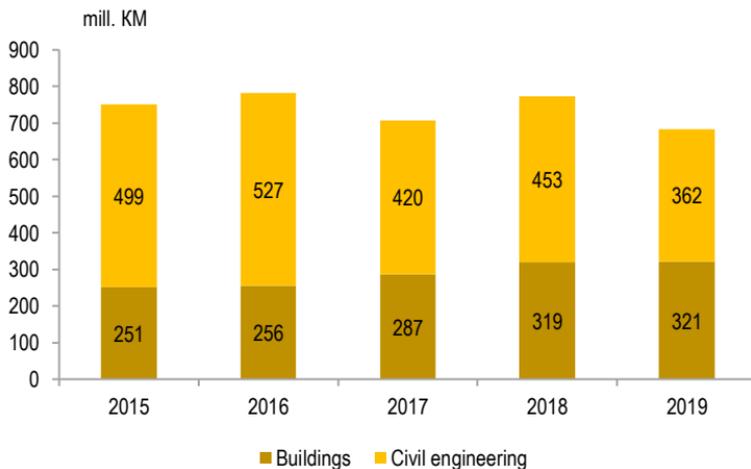

Energy had a share of 5.4% in the total Gross domestic product.

Approximately 12 thousand workers were employed in the energy sector, which accounted for around 5% of all employed persons in Republika Srpska. The number of persons employed in the energy sector was 0.3% higher in 2019 than in 2018.

*Knowing how things are done is not difficult. Doing them is difficult.*  
Socrates

The value of performed construction works in Republika Srpska decreased by 11.5% in 2019 compared to 2018. Buildings accounted for 47.0% of the total value of performed works and their value increased by 0.5%, while for civil engineering a decrease by 20.0% was recorded. During the same period, the number of workers engaged on construction sites increased by 2.7%.

In 2019, Gross value added of construction had a share of 5.7% in the formation of Gross domestic product of Republika Srpska, while gross fixed capital formation in new fixed assets in construction participated with 17.2% in the total gross fixed capital formation.

Graph 17.1. Value of performed works

Compared to the previous year, the number of completed dwellings in 2019 was 26.2% higher. An increase in dwelling construction was recorded for one-room dwellings (70.9%) and for two-room dwellings (26.5%). The highest share in the structure of completed dwellings was that of two-room dwellings (42.1%), followed by one-room dwellings with 31.0%, while the rest were three- or more-room dwellings.

# CONSTRUCTION

## 17.1. Completed dwellings by number of rooms

	Unit of measure	2018	2019
TOTAL	number	1,607	2,028

	m <sup>2</sup>	10,718	11,159

**Construction employs 4.6% of the total number of employed persons in Republika Srpska**

### DO YOU KNOW?

In 2019, the most common newbuilding works were works on residential buildings with three or more dwellings (32.6%) and roadworks on motorway network (19.5%).

*There can be no negotiation with conscience.*

Saint-Simon

Data on import and export refer to business entities with headquarters in Republika Srpska.

External trade statistics covers all traffic of goods exported from and imported into the country, homogenous by type of product, country of origin, destination, payment method and moment of border crossing.

In accordance with European standards, data are covered under the special trade system, which means that in addition to regular exports and imports, exports and imports based on the refinement process, i.e. processing and finishing, are also covered, while temporary exports and imports are excluded.

Export and import realised by physical entities is excluded from the total value of export and import.

### **Decrease in external trade in 2019**

In the period between 2015 and 2018, export from Republika Srpska was continually increasing, while in 2019 a decrease was recorded.

Compared to 2018, export decreased by 3.5% in 2019, while import decreased by 8.4%. Volume of external trade of Republika Srpska in 2019 was 8.4 billion KM, of which 3.6 billion KM referred to export and 4.8 billion KM to import. External trade deficit of Republika Srpska in the same year amounted to 1.2 billion KM.

The highest value of export from Republika Srpska in 2019 was that of export to Italy (15.8%), followed by Serbia (13.7%), Croatia (11.6%), Slovenia (10.9%) and Germany (9.2%).

During the same year, the highest value of import was that of import from Serbia (18.6%), followed by Italy (14.9%), Germany (9.4%), China (7.9%) and Slovenia (6.1%).

### **Coverage of import with export in 2019 was 75.5%**

Coverage of import with export in Republika Srpska, as in most neighbouring countries, increased from 2018 to 2019.

## EXTERNAL TRADE

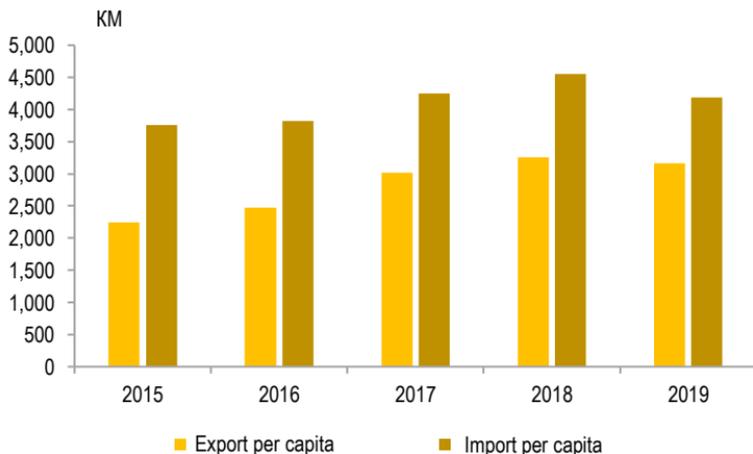

In Republika Srpska's trade of goods with foreign countries in 2019, the highest share in export was that of products from the division Products of the chemical or allied industries, while the highest share in import was that of products from the division Machinery, apparatus and mechanical devices.

In the structure of export in 2019, the highest share was that of the division Products of the chemical or allied industries with 12.9%, followed by the division Basic metals and related products with 12.6% and the division Footwear, hats and caps with 12.5%.

In the structure of import in the same year, the highest share was that of the division Machinery, apparatus and mechanical devices with 15.5%, followed by the division Products of the chemical or allied industries with 10.4% and the division Food products, beverages, alcoholic beverages with 9.8%.

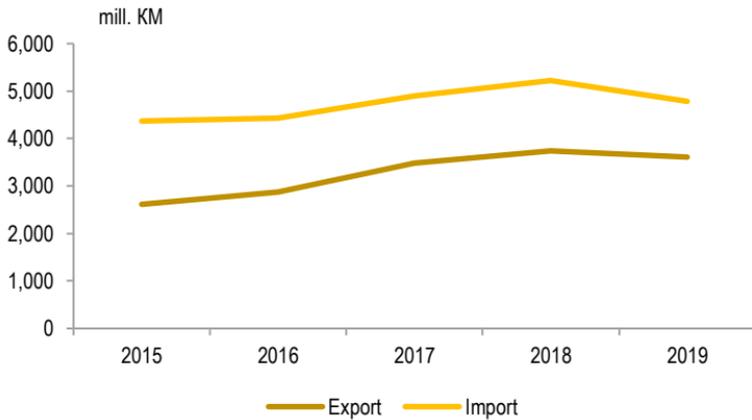

### DO YOU KNOW?

In 2019, of total export from Republika Srpska, 92.2% was export to the EU member states and CEFTA countries.

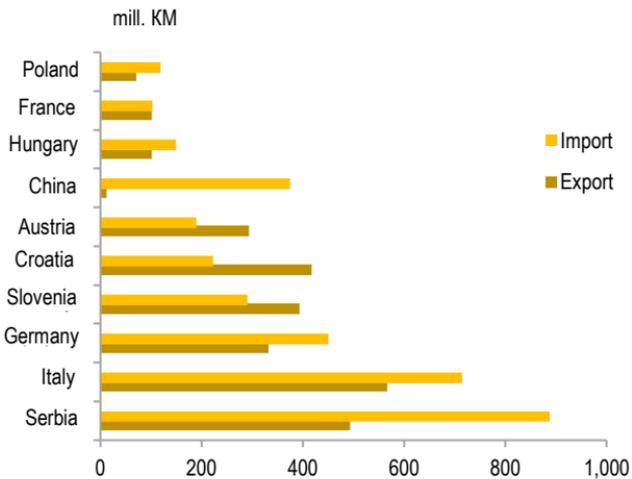

Graph 18.1. Export and import per capita

# EXTERNAL TRADE

## 19 DISTRIBUTIVE TRADE

*Doing business without advertising is like winking at a girl in the dark.*

Steuart Henderson Britt

Distributive trade is a set of all forms of trade activities, from the purchase of goods from manufacturers to the delivery of goods to final consumers on domestic market. It covers wholesale trade for own account, intermediation in wholesale trade, retail trade and repair of motor vehicles and motorcycles, and retail trade of household goods.

Data on turnover realised by entrepreneurs are not included in total turnover.

Turnover in retail trade in 2019, compared to the base year 2015, was nominally 31.8% higher and really 31.6% higher. During the same period, turnover in wholesale trade, measured by the nominal growth rate, increased by 36.4%.

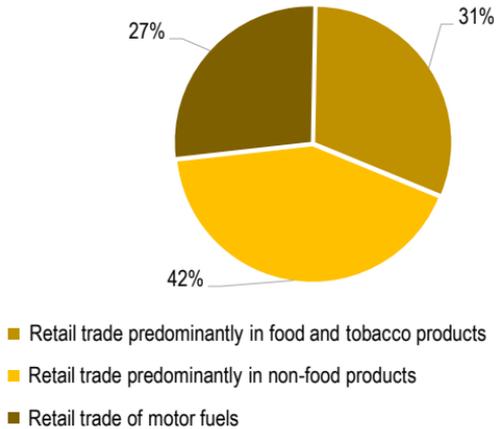

### 19.1. Indices of turnover in distributive trade by class of activity classification

	Distributive trade, TOTAL	Wholesale and retail trade of motor vehicles and motorcycles, repair of motor vehicles and motorcycles	Wholesale trade, except of motor vehicles and motorcycles	Retail trade, except of motor vehicles and motorcycles	
				nominal	real
2015	100.0	100.0	100.0	100.0	100.0
2016	99.4	105.2	96.4	108.5	112.2
2017	107.1	122.1	107.5	112.7	115.4
2018	115.3	120.9	112.4	123.3	123.0
2019	123.1	136.4	120.9	131.8	131.6

#### DO YOU KNOW?

Turnover in online retail trade in 2019 increased more than fourfold in comparison with 2010.

## DISTRIBUTIVE TRADE

Graph 19.1. Share of turnover according to activity classification in total retail trade turnover, 2019

*The world is too vast for us pedestrians.*  
Dobrica Ćosić

The trend of intensified tourism growth in Republika Srpska continued in 2019. This was to be expected based on the indicators from 2018 and previous years. It is of particular importance that the collected and processed data indicate an increase both in the number of tourist arrivals and in the number of tourist nights. The increase in the number of tourist nights has been significant, which is very important. Obviously, this is the key to blossoming tourism; the goal is not only to attract tourists, but also to keep them for a long time, making the country's tourism more than just mere transit tourism.

Attracting tourists with abundant natural beauties only is not enough for fruitful tourism. Investment in infrastructure and well-planned tourism and marketing strategy pay off; the Olympic mountain Jahorina is a proof of this, as it recorded an awesome winter season. Also, additional facilities are being built in order to make Jahorina attractive to more tourists during the rest of the year. Apart from Banja Vrućica which is representative in terms of success, Kulaši, Slatina and Laktaši also achieved good results when it comes to spa tourism. In cultural tourism, both domestic and international tourists were especially attracted to Andrićgrad near Višegrad, while national parks Kozara and Sutjeska stand out among the pearls of domestic tourism. The construction of the road towards Sutjeska and Tjentište opened new routes for festival tourism, as a new form of tourist offer (very popular OK Fest), while also allowing communication towards Herzegovina and the sea. Drina is certainly about to become a huge tourist treasure being intact and unexplored in its upper course. Also, the National Park Drina was founded in the territory of the Municipality of Srebrenica.

In terms of congress tourism, ethno village Stanišići is very important. Also, further development of ethno tourism is expected, as other ethno villages, besides the famous Zelenkovac, Kotromanićevo, Pecka, are also developing. The vicinity of the sea and wine roads, as well as religious tourism, are bringing more and more guests to the destinations in Herzegovina as well, especially to the City of Trebinje. New tourist "products", when it comes to investments, include the impressive Sun City in Trebinje, Ravna Planina near Pale with a new gondola, and "Pecka Outdoor Festival", held in ethno village Pecka.

A large shopping centre has been opened in Banja Luka, which means that this city will add the so-called shopping tourism component to its existing offer, including the beautiful Vrbas, Kastel and excellent gastronomic offer. Sports tourism is also rapidly developing, as prestigious city races for marathon runners and recreational runners are being organised, as well as through the increasingly popular trail running (Jahorina Ultra Trail), bicycle race Belgrade-Banja Luka as a first-class international race, and competitions in kayaking and canoeing in wild waters, especially on Vrbas.

In addition to the existing highway 9 January, between Banja Luka and Doboj, the announced construction of the Belgrade-Sarajevo highway, the start of activities related to the construction of the Banja Luka-Prijedor highway and the 5c corridor, the plan is also to build high-speed roads in Republika Srpska.

Such infrastructure will certainly increase tourism income, as many travelers will visit Srpska more often thanks to good roads.

Air transport is being rapidly developed by means of low-cost airlines, as new routes from the airport Mahovljani near Banja Luka towards Western Europe have been opened (Brussels, Stockholm, Menningen, Berlin) and new routes announced. In this way, Republika Srpska is becoming connected with the world by means of air transport, as the number of passengers from the Mahovljani airport has multiplied, about which we also provide data in this publication.

It is important to point out that the Ministry of Trade and Tourism of Republika Srpska has declared Banja Luka and Istočno Sarajevo tourist centres with the aim of establishing centres that will play a key role in the development of tourism in Republika Srpska.

All the above has or will significantly affect the increase in the number of tourists in Republika Srpska. The goal is to keep the guests and extend their stay, but also to give them a reason to visit again.

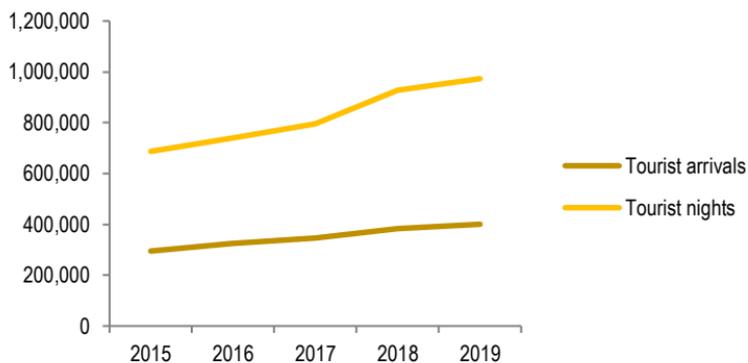

## DO YOU KNOW?

During the year, most overnight stays of tourists are generally realised in August, as shown by an analysis of the data referring to the last three years (2017-2019).

In 2019, the number of tourist arrivals increased by 4.8% in comparison with 2018, while the number of tourist nights increased by 5.0% during the same period. Of the total number of nights realised by foreign tourists, tourists from Serbia realised the highest number of nights, with a share of 27.1%, followed by tourists from Croatia with 25.6% and Slovenia with 9.6%.

When it comes to overnight stays of tourists from outside the region, guests from Germany, Turkey, Italy, Austria, France and China take the lead.

## TOURISM

Graph 20.1. Tourist arrivals and nights, by year<sup>1)</sup>

<sup>1)</sup> Since January 2013, for accommodation facilities in spa resorts where people stay for medical rehabilitation, only arrivals and nights for persons who pay for the stay themselves are shown.

## 21 TRANSPORT AND COMMUNICATIONS

*Suspicion amongst thoughts are like bats amongst birds, they never fly by twilight.*

Francis Bacon

### Transport of passengers and goods

In 2019, approximately 25 million passengers were transported, which represented a decrease by 7.6% compared to the previous year, with 76.2% of the total number of passengers being transported in municipal transport

#### 21.1. Transport of passengers and goods by transport branch

	2015	2016	2017	2018	2019 <sup>1)</sup>
<b>ROAD AND URBAN TRANSPORT</b>					
Length of roads, km <sup>2)</sup>	14,226	14,336	13,960	15,402	13,947
Transported passengers, thous.	29,568	28,477	29,334	27,670	25,566
Transported goods, thous.tonnes	3,747	3,522	4,020	4,184	2,940
<b>RAILWAY TRANSPORT</b>					
Length of tracks, km	426	417	417	417	417
Transported passengers, thous.	178	160	117	137	160
Transported goods, thous.tonnes	4,964	4,416	4,529	4,569	4,567
<b>AIR TRANSPORT SERVICES</b>					
Number of flights	1,043	1,474	1,468	1,474	2,464
Number of passengers	22,793	21,697	20,761	36,411	149,968

A decrease by 29.7% was recorded in transport of goods in road transport in comparison with 2018, with transport of goods in railway transport remaining unchanged. Railway transport served to transport approximately 60% of all transported goods.

An increase was recorded in airport services, with the number of flights and the number of passengers both increasing. Compared to the previous year, the number of passengers transported by international aircrafts increased fourfold.

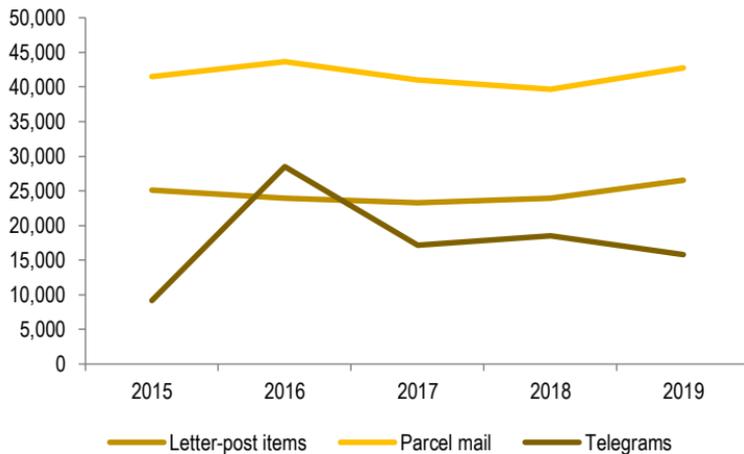

<sup>1)</sup> In 2019, the decrease in the length of road network was caused by a recategorisation of main and regional roads into local roads

<sup>2)</sup> Source: Local self-government units, PE "Putevi Republike Srpske" and PE "Autoputevi Republike Srpske "

# TRANSPORT AND COMMUNICATIONS

## Postal activities

The number of letter-post items in 2019 increased by 10.8% and the number of parcel mail items increased by 7.9% compared to the previous year.

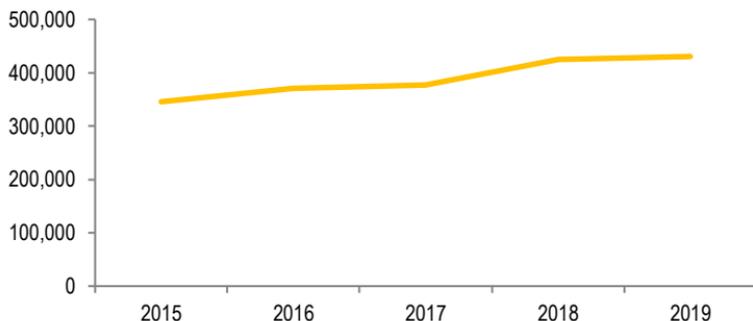

Graph 21.1. Postal activities

## Registered vehicles

In 2019, in Republika Srpska the number of registered vehicles increased by 1.4% compared to 2018.

Of the total number of registered vehicles, 84.6% were registered passenger vehicles.

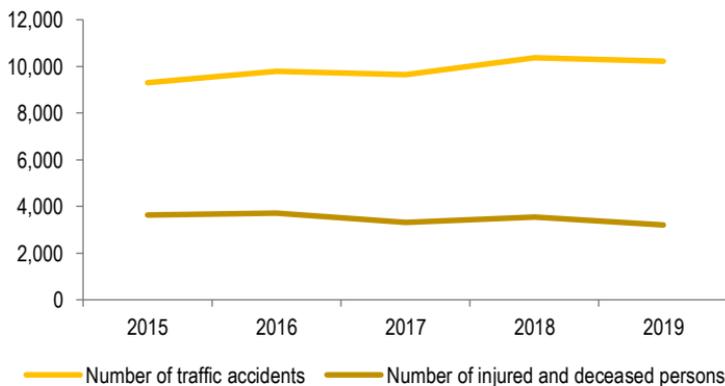

## TRANSPORT AND COMMUNICATIONS

Graph 21.2. Total number of registered vehicles

### Traffic accidents

Compared to 2018, the number of traffic accidents in Republika Srpska in 2019 decreased by 1.4%. The number of persons who deceased due to traffic accidents decreased by 9.2% and the number of persons injured in traffic accidents decreased by 9.4% compared to the previous year.

Graph 21.3. Number of traffic accidents and injured and deceased persons

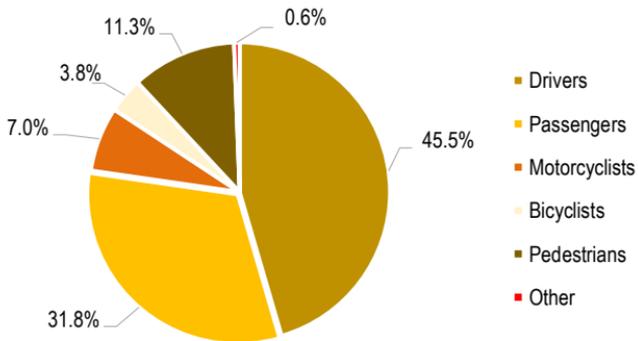

# TRANSPORT AND COMMUNICATIONS

## DO YOU KNOW?

The highest number of traffic accidents occur during holidays and vacations – in August and December.

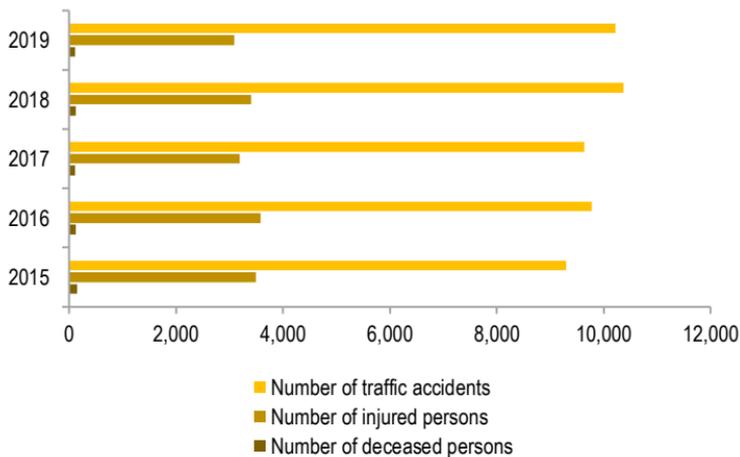

The most endangered participants in traffic accidents were drivers (45.4%).

Speeding, failure to maintain a safe trailing distance and reversing were the most common causes of traffic accidents.

Graph 21.4. Injured persons by their participation in traffic accidents, 2019

## 22 EDUCATION

*They say that misfortune is a good school. Yes, true. But happiness is the best university.*

Alexander Sergeyevich Pushkin

### PRESCHOOL EDUCATION AND UPBRINGING

The system of preschool education and upbringing in the school year 2019/2020 consisted of 174 preschool institutions, of which 91 were established by local communities and 83 were established by private entities, citizens' associations and religious organisations.

There were 13,138 children in preschool institutions in the school year 2019/2020, of which 6,801 (51.8%) boys and 6,337 (48.2%) girls. Twenty municipalities in Republika Srpska have no preschool institutions. However, a significant increase in the number of preschool institutions was recorded in comparison with the previous school year, resulting in an increased number of children in these institutions.

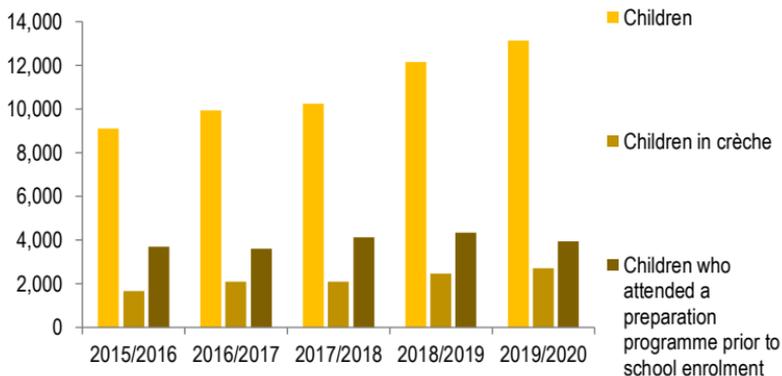

In the school year 2019/2020, there were 1,996 employed persons in preschool institutions, of which 1,144 were educators.

In the structure of employed persons in preschool institutions, 92.8% were female, which indicates an underrepresentation of male educators and other male employees in general. However, this is also a typical situation in systems of preschool upbringing and education of developed countries.

#### 22.1. Preschool education and upbringing

School year	Number of institutions	Children	Girls	Children in crèche	Preparation programme prior to school enrolment	Employed persons, total	Female	Educators
2015/2016	124	9,093	4,367	1,675	3,705	1,392	1,276	724
2016/2017	132	9,953	4,769	2,081	3,602	1,518	1,389	794
2017/2018	132	10,240	4,942	2,097	4,130	1,587	1,459	843
2018/2019	161	12,156	5,815	2,470	4,352	1,860	1,719	1,010
2019/2020	174	13,138	6,337	2,704	3,938	1,996	1,854	1,144

## EDUCATION

Graph 22.1. Preschool education and upbringing

### DO YOU KNOW?

Due to the shortage of places in public kindergartens in Republika Srpska, there is a waiting list of 1,406 children.

### PRIMARY EDUCATION AND UPBRINGING

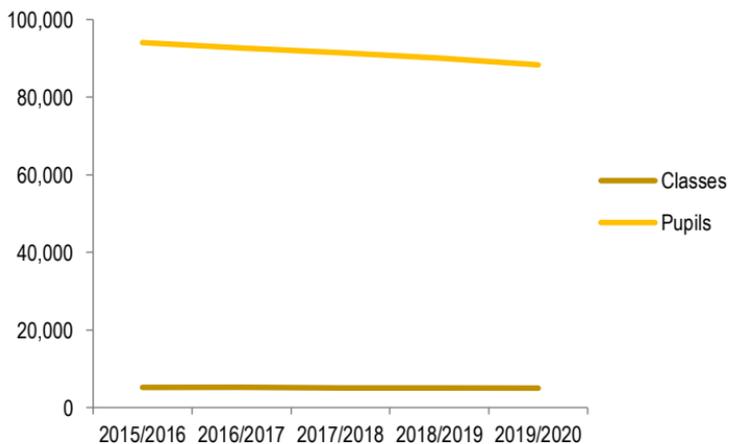

A decreasing birth rate, negative migration balance, fewer new marriages and a growing number of divorces are just some of the reasons that directly affect the population decline, thus also causing a decrease in the number of children who enroll in primary school. Therefore, primary education statistics referring to the previous five-year period indicate that the so-called "white plague" is becoming an increasingly serious problem.

At the beginning of the school year 2019/2020, compared to 2018/2019, the number of pupils in primary schools decreased by 1.8%, therefore there were 1,672 pupils fewer. There were 47 classes fewer and five teachers fewer. There were 18 pupils per class on the average, while this percentage in the EU is 25 to 30. In accordance with the Law on Primary Education and Upbringing, a class should optimally have 25 pupils, with the minimum of 18 and the maximum of 30, or 32 if there is only one class of the given grade.

## SECONDARY EDUCATION AND UPBRINGING

The main objective of secondary education is to develop and improve knowledge, competences and skills required for vocational work, to provide internationally comparable level of knowledge, and to prepare for further education at higher education institutions.

There were 37,206 pupils enrolled in secondary schools at the beginning of the school year 2019/2020, which represents a decrease by 3.3% compared to 2018/2019. As in the previous years, the most popular school among pupils was grammar school, thus 7,781 pupils or 20.9% of all pupils were enrolled in grammar schools.

### 22.3. Secondary education and upbringing at the beginning of the school year

## Halls of residence for pupils and students

Halls of residence for pupils and students are educational institutions providing accommodation, food and upbringing to pupils and students during their schooling. The main role of these premises is to provide pupils and students separated from their families with educational activities, accommodation, food, learning conditions, completion of their school obligations, and cultural and sporting activities.

If we observe beneficiaries of halls of residence for pupils and students by sex, it can be concluded that there are more female beneficiaries in halls of residence for pupils, with the percentage of 55.9%, while this percentage is even higher in halls of residence for students, namely 60.1%

### 22.4. Halls of residence for pupils and students

## HIGHER EDUCATION

**In the academic year 2019/2020, the number of students enrolled in the first and second cycles of studies decreased, while the number of those enrolled in the third cycle increased.**

In the academic year 2019/2020, at higher education institutions in Republika Srpska, the total number of students enrolled in all three cycles of studies was 29,440, which represents a decrease by 6.4% compared to the previous academic year. In the academic year 2019/2020, the number of students enrolled in the first and second cycles of studies decreased, while the number of students enrolled in the third cycle increased. There were 2,026 students fewer than in the previous academic year at the first cycle of studies. At the second cycle of studies, there were 23 students fewer, while there were 46 students more at the third cycle. By sex structure of enrolled students, there were more female students at all three cycles of studies.

In Republika Srpska, 20,981 students are enrolled at four public higher education institutions, namely 71.3% of all enrolled students. Public higher education institutions are the University of Banja Luka, the University of Istočno Sarajevo, High Medical School in Prijedor and Higher School of Hotel Management and Tourism in Trebinje. There were 8,459 students (28.7%) enrolled at sixteen private higher education institutions.

There were 26,980 students enrolled in the first cycle of studies and slightly over half of them belong to the age group between 20 and 24 years.

Of the total number of those enrolled in the second cycle of studies, 16 students were enrolled in master studies according to the old programme and 2,109 in master studies according to the new programme, while 170 students were enrolled in specialist studies. Two thirds of those enrolled in the second cycle of studies were persons under 30 years of age.

There were 119 doctoral candidates enrolled in the third cycle of studies, with higher participation of female students. Approximately 72% of doctoral candidates were persons under the age of 39.

### **In 2019, studies were completed by 4,652 students**

At the first cycle of studies, 4,144 students graduated. More than half of graduated students were female (59%). A third of students who graduated in 2019 completed studies in the field Business, administration and law, while the lowest number of graduated students was recorded in the field Services (3.1%).

The title of master of science and master and the title of specialist in 2019 were awarded to 466 candidates, of which approximately 40% were male. The title of doctor of science was awarded to 42 candidates, of which 62% were male.

The highest number of master's and specialist's theses was in the field Social sciences, journalism and information (31.8%), while the lowest number of these was recorded in Agriculture, forestry, fishing and veterinary medicine (2.4%) and Services (0.2%).

The highest number of doctoral candidates defended their doctoral dissertations in the field Social sciences, journalism and information (59.6%), while the lowest number of defended doctoral dissertations was in the fields Humanities and arts (2.3%) and Information and communication technologies (2.3%).

### **At higher education institutions, there were 2,795 employed teachers and assistants**

At higher education institutions, in the academic year 2019/2020, there were 2,795 employed teachers and assistants. Presented by full-time equivalent, the total number of teachers and assistants was 2,173.8. Every third teacher had the academic title docent professor, while half of all assistants were senior assistants.

## 23 CULTURE AND ART

*Love art in yourself, and not yourself in art.*  
Stanislavski

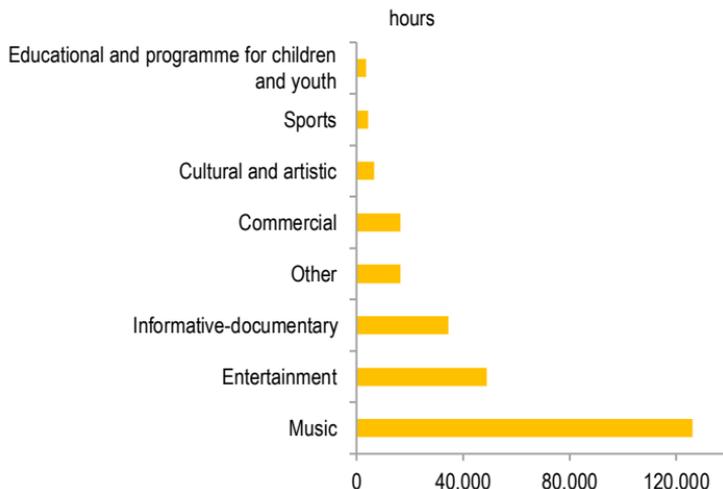

Culture represents not only a spiritual need or food for the soul, but also the character and identity of a nation. Art is an important thread of life for every individual; it is an immeasurable and invisible fluid that elevates and ennobles humans and makes them happy. The need to create, even artistically, develops the human mind to unimaginable limits.

In Republika Srpska, in 2019, compared to 2018, an increase was recorded in the number of visitors of domestic film screenings, which was also the case with plays in children's theatre and professional theatre.

The number of cinema visitors in 2019 increased by 104% for domestic film screenings in comparison with 2018. During the same period, an increase in number of visitors per play (184) was recorded for children's theatre.

Mainly music, entertainment and informative-documentary programmes were broadcast by radio stations in 2019, while educational and programme for children and youth were least represented.

Compared to 2018, the number of broadcast hours increased by 1.5% in 2019.

Graph 23.1. Programme broadcast by radio stations, 2019

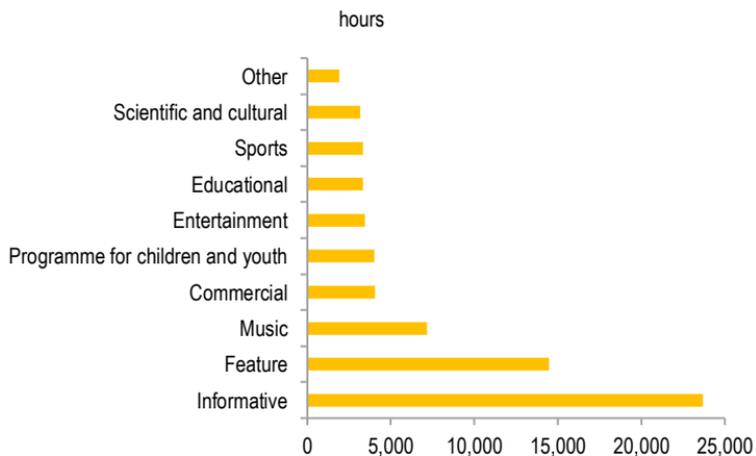

## CULTURE AND ART

In 2019, mainly informative, feature and music programmes were broadcast by TV stations, while scientific and cultural programmes were least represented.

Compared to 2018, the number of broadcast hours decreased by 10% in 2019.

### DO YOU KNOW?

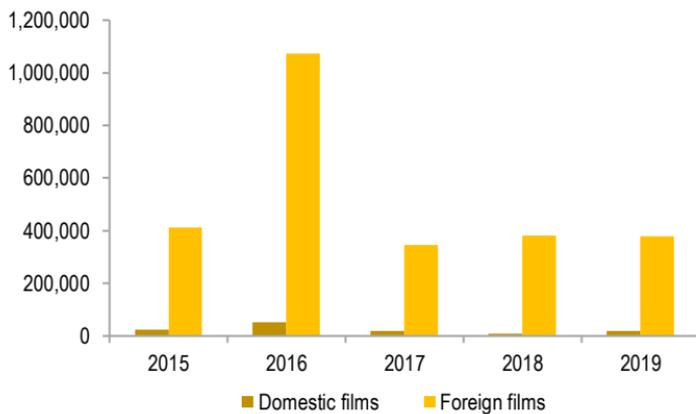

Although in Republika Srpska the number of visitors of domestic film screenings increased by 104% in 2019 in comparison with 2018, the number of visitors of foreign film screenings decreased by 0.8 %.

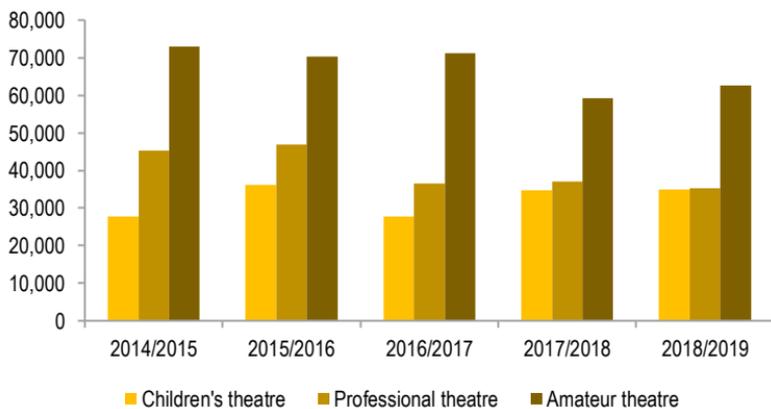

Graph 23.2. Programme broadcast by TV stations, 2019

In 2019, the number of users of the library fund decreased by 7.5% compared to 2018.

*The easier the tears flow, the easier they dry.*

Nikolai Gogol

In the public health sector of Republika Srpska in 2019 there were 13,841 employed medical staff and associates, out of which 38.1% were employed at health care centres. Out of the total number of employed persons, 18.9% were doctors of medicine. In the same period, private health care institutions employed 2,802 persons, out of which 8.9% were doctors of medicine.

There were approximately 4.55 million visits to the General and Family Medicine services and approximately 28.0% of these were first visits to the physician. The first visit is a contact realised for the first time with a physician due to a disease, condition or injury. One person may, in the course of one year, visit a physician several times, but each time due to different disease, and in that case, each visit is considered to be the first visit due to that disease.

In 2019, there were 224,715 persons who concluded their hospital treatment, which represented an increase by 4.7% compared to 2018.

#### DO YOU KNOW?

The total number of pharmacists performing their primary activity in public health has been evidently increasing. Thus, in 2019, the total number of pharmacists increased by 14.7% in comparison with 2010.

# HEALTH

## Cases of varicella were the most common

Among all reported cases in 2019, the highest number was that of varicella cases (approximately 3.8 thousand), even though their share in the total number decreased by 33.4% compared to 2018.

In 2019, a weakening of the measles (B05) epidemic observed in 2014 in Republika Srpska was recorded. The share of measles cases in the total number of diseased persons in 2015 was 14.7%, while in 2019 this share amounted to 0.9%.

## 24.2. Reported cases of infectious and parasitic diseases in Republika Srpska

	Number of reported cases
2015	16,418
2016	14,289
2017	13,419
2018	14,535
2019*	7,922

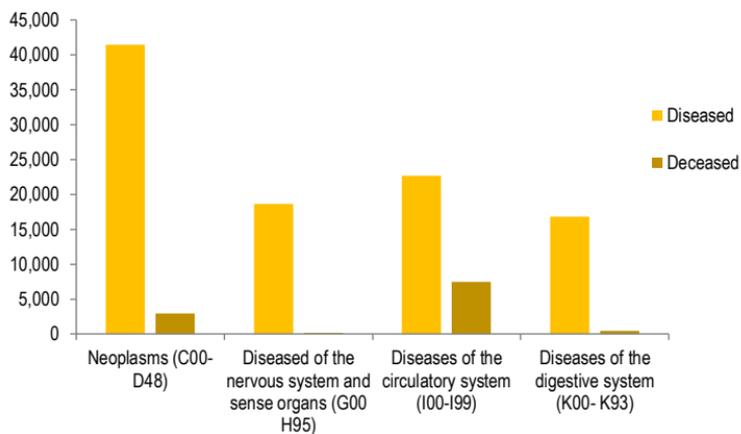

Source: Republika Srpska Public Health Institute

\* In 2019, the Public Health Institute of Republika Srpska revised the list of infectious diseases. Thus, the new list does not include certain diseases which were included in the list used in previous years (streptococcal pharyngitis and tonsillitis, contact and exposure to rabies, scarlet fever, erysipelas, bacterial meningitis, scabies, nonspecific viral hepatitis, HBsAg carriers and HCV antibody carriers).

In addition to this modification, in 2019 the data we observe as part of influenza surveillance are presented differently.

## Among diseased persons, most frequent were cases of neoplasms, while most deaths occurred due to diseases of the circulatory system

In 2019, there were 212,694 cases of diseased persons in Republika Srpska. Out of the total number of disease cases, 19.5% were cases of neoplasms and during this period approximately 19.2% of persons deceased due to this disease. There were 7,473 persons, or 49.6% of all deceased persons, who deceased due to the diseases of the circulatory system, which affected approximately 10.7% of persons in the previous year.

## Child support beneficiaries

The total number of beneficiaries realising the right to child support in 2019 was 15,388, and the number of children realising the right to child support in the same year was 21,862.

In 2019, the total number of beneficiaries realising the right to child support decreased by 29.5%, while the number of children realising this right decreased by 19.6%.

Graph 26.8. Number of child support beneficiaries and number of children

## 27 RESEARCH AND DEVELOPMENT

*Don't be eager to know everything lest you become ignorant of everything.*

Democritus

The modern market is characterised by permanent uncertainty and the need for constant adjustment, which can be achieved only by systematic investment in research and innovation.

**In 2019 in Republika Srpska, 17.7 million KM was spent on research and development, of which 9.6 million KM was spent in the business sector**

Gross domestic expenditure for research and development in Republika Srpska in 2019 amounted to 17,687,000 KM, of which current expenditure accounted for 86.6%, while the rest was investment expenditure. Current costs cover labour costs, costs of compensation to employees and other current costs, while investment expenditures cover expenditure for land and buildings, machinery and equipment, patents, licences, studies and projects, hardware and software, and other investment expenditures. Nearly half of the total gross domestic expenditure was spent in the field of *Engineering and Technology* (47.4%). *Engineering and Technology* is a field of science that covers construction and architecture, materials, electrical engineering, electronics and information engineering, as well as mechanical, chemical, medical and environmental engineering, industrial and environmental biotechnology, nanotechnology and other engineering and technology.

The term research and development covers three types of activity: basic research, applied research and experimental development. In Republika Srpska, 57.7% of total funds was spent on applied research, 28.3% on basic research, and 14.0% on experimental development.

Almost a third of total funds spent on research and development was spent on *General advancement of knowledge* (31.5%), while 26.9% was spent on *Transport, telecommunication and other infrastructures*, 15.6% on *Agriculture* and 10.9% on *Industrial production and technology*.

Own funds of units engaged in research and development were a source of 4/5 of the funds spent.

In 2019, government budget appropriations or outlays for research and development in Republika Srpska amounted to 24.8 million KM. By sector, the largest part of funds was intended for higher education 96.6%, followed by government sector with 2.7%, business sector with 0.4% and non-profit sector with 0.3%. There were no appropriations or outlays for the abroad sector. The objective of *General advancement of knowledge: Research and development financed from general university funds* received the largest part of the appropriations (69.7%).

## RESEARCH AND DEVELOPMENT

In 2019, there were 1,355 persons engaged in research and development, or 830.3 persons if expressed in full-time equivalent. Full-time equivalent represents the number of persons engaged full-time in research and development.

Of all employed and hired persons, including researchers, technicians and other supporting staff, 70.6% were researchers. Of the total number of researchers, almost half are women.

### **In the period 2016 – 2018 in Republika Srpska nearly 1/4 of enterprises were innovation active**

Innovation-active enterprises are those that, in the observation period, have had completed product or process innovation activities and/or ongoing innovation activities (activities that were ongoing at the end of 2018) and/or abandoned innovation activities and/or in-house research and development activities and/or contract-out research and development activities. In the period 2016 – 2018, 24.3% of enterprises introduced at least one of the above innovation activities, while 75.7% introduced no innovation activities whatsoever.

Innovation activity of enterprises increases as their size increases. Thus, nearly half of the enterprises in the observed number of large enterprises (250 employees and more) were innovation-active, 28.3% in the observed number of medium enterprises (between 50 and 249 employees), while 21.9% of enterprises in the group of small enterprises (between 10 and 49 employees) were innovation-active.

Most enterprises introduced product or process innovation activities. A product innovation is a new or improved good or service that differs significantly from the enterprise's previous goods or services and which has been implemented on the market. In the period 2016 – 2018, 17.5% of enterprises introduced product innovation.

A business process innovation is a new or improved business process for one or more business functions that differs significantly from the enterprise's previous business processes and which has been brought into use by the enterprise. In the period 2016 – 2018, 16.5% of enterprises introduced business process innovation.

### **DO YOU KNOW?**

Almost two thirds of the enterprises in the period 2016-2018 purchased machinery, equipment or software based on the same or improved technology previously used in the enterprise.

*If man fails to reconcile justice and freedom, he fails in everything.*  
Albert Camus

Fight against crime and criminal activities is manifested through detecting and resolving criminal offences and the prosecution and punishment of offenders.

A criminal offence in any case represents an attack against social and civilisation values which each country seeks to ensure maximum protection. Therefore, all modern legal systems have an interest and will to respond effectively to threats to their protected values by sanctioning criminal offences.

At a time when contemporary crime becomes a transnational phenomenon, reactions of a legal state to its manifestations are becoming increasingly important.

Criminal and legal liability and imposing sanctions for perpetrated criminal offences pursuant to legislative solutions are for obvious reasons defined and applied (and also statistically monitored) for both adult and juvenile offenders.

### ADULT PERPETRATORS

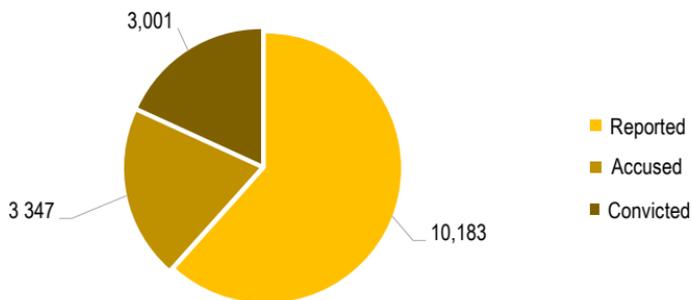

In 2019, Public Prosecutor's Offices in Republika Srpska resolved 10,183 criminal charges filed against adults and for 28.6% of these the identity of the perpetrator was not determined. As in the previous year, criminal offences against property were the most common offences. Thus, these accounted for 48.9% of the total number of resolved criminal charges.

During the same period, 3,347 persons were accused and 3,001 persons were convicted at the competent courts. Of all convicted persons, 92.4% were male, of which 21.7% were between 30 and 39 years of age. Nearly one in three accused persons was charged with a property offence, while one in seven perpetrators was charged with a criminal offence against life and body.

When it comes to perpetrators who were found guilty, the most common sanction was conditional sentence, namely in 53.8% cases. Fine was imposed in 31.8% cases, while in 14.2% cases unconditional imprisonment was imposed.

## DO YOU KNOW?

When it comes to criminal offences against civil rights and freedoms, an increase by 18.1% was recorded in the number of resolved criminal charges in 2019 when compared with the same group of criminal offences in 2018. During the same period, an increase by 29.3% was recorded in the number of perpetrators of criminal offences against public order.

Graph 28.1. Adult perpetrators of criminal offences – reported, accused and convicted, 2019

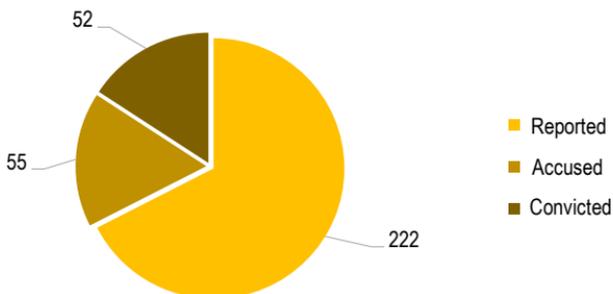

## JUVENILE PERPETRATORS

Out of the total of 222 resolved criminal charges for juvenile persons in 2019, 130 referred to older juvenile persons (persons who completed 16 years of age, but still did not complete 18 years of age). Criminal offences against property were the most common among reported persons, namely 50.5%, followed by criminal offences against life and body, with 22.5%.

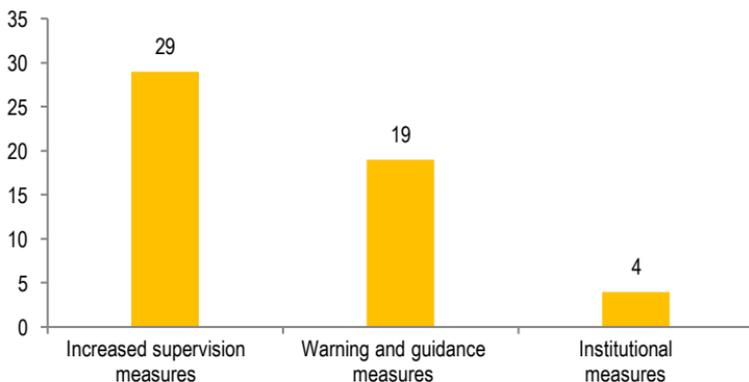

There were 55 accused juvenile perpetrators and for 94.5% of them a criminal sanction was imposed. Besides property offences, of which 56.4% of all juvenile perpetrators were accused, 16.4% of juvenile perpetrators were accused of criminal offences against life and body.

## CRIME

Of the total of 52 imposed criminal sanctions, 98.1% were imposed against male persons. No juvenile imprisonment sanctions were imposed in 2019. The most common measures were increased supervision, 55.8%, followed by warning and guidance measures 36.5% and institutional measures 7.7%.

Graph 28.2. Juvenile perpetrators of criminal offences – reported, accused and convicted, 2019

Graph 28.3. Imposed criminal sanctions, juvenile perpetrators, 2019

Dear Users,

This publication is intended for a wide range of users, providing main indicators of the situation and changes in the economic and social life of Republika Srpska.

Regular statistical activities carried out by the Republika Srpska Institute of Statistics are the main source of data for tables and graphs for which source of data is not specified.

For easy reference, data in certain tables and graphs are given in larger units of measure (thousand, million), while, due to the rounding-off, total amounts do not always correspond to sums of data for individual categories.

Data presented by specific level of the activity classification are presented pursuant to the KD BiH 2010, which in its content and structure fully complies with the EU Statistical Classification of Economic Activities NACE Rev.2.

In order to achieve compliance with the current regulations in the field of short-term statistics and EU standards, since 2015 the Republika Srpska Institute of Statistics has been carrying the survey "Quarterly indicators in hotels and restaurants" instead of the quarterly survey on hotels and restaurants, thus regularly producing and publishing relative indicators at the quarterly level. Data obtained through the new survey are linked to data referring to previous years by means of the recalculation using growth rates; the series of indices in the field of hotels and restaurants has therefore been preserved.

**Note:** In chapters which provide tabulated data by the KD BiH, sections of the classification of economic activities are specified by English alphabet letter codes, in accordance with international labelling, while a full explanation of these codes is given in the chapter entitled "Sections of Economic Activity".

When using data from this publication, we would appreciate it if you cited the source (Republika Srpska Institute of Statistics and the title of this publication).

# SYMBOLS AND ABBREVIATIONS

-	no occurrence
...	data not available
0	data lower than 0.5 of the given unit of measure
Ø	average
( )	less reliable data – coefficient of variation (CV) lower than 0,2 and equal to or higher than 0.1 or expressed in percentage as follows $10\% \leq CV < 20\%$
(( ))	unreliable data – coefficient of variation (CV) lower than 0.3 and equal to or higher than 0.2 or expressed in percentage as follows $20\% \leq CV < 30\%$
•	extremely unreliable data – coefficient of variation (CV) is equal to or higher than 0.3 or expressed in percentage as follows $CV \geq 30\%$
:	statistically unreliable data (up to 20 occurrences)
*	corrected data
***	confidential data
1)	symbol for footnote in a table
°C	degree Celsius
m	metre
m <sup>2</sup>	square metre
m <sup>3</sup>	cubic metre
km	kilometre
km <sup>2</sup>	square kilometre
elev.	elevation
ha	hectare
t	tonne
kW	kilowatt
GWh	gigawatt hour
Gg	gigagram
CO <sub>2-eq</sub>	carbon dioxide equivalent
thous.	thousand
mill.	million
bn	billion
pcs	pieces
Sm <sup>3</sup>	a cubic metre of gas under a standard condition
HBS	Household Budget Survey
LFS	Labour Force Survey
GDP	Gross Domestic Product
COICOP	Classification of Individual Consumption by Purpose
ISCED	International Standard Classification of Education
NACE Rev. 2	Classification of Economic Activities in the European Community
KM	Convertible Mark (BAM)
KD	Classification of Economic Activities

## SECTIONS OF ECONOMIC ACTIVITY<sup>1)</sup>

<b>A</b>	Agriculture, forestry and fishing
<b>B</b>	Mining and quarrying
<b>C</b>	Manufacturing
<b>D</b>	Electricity, gas, steam and air-conditioning supply
<b>E</b>	Water supply; sewerage, waste management and remediation activities
<b>F</b>	Construction
<b>G</b>	Wholesale and retail trade; repair of motor vehicles and motorcycles
<b>H</b>	Transportation and storage
<b>I</b>	Accommodation and food service activities
<b>J</b>	Information and communication
<b>K</b>	Financial and insurance activities
<b>L</b>	Real estate activities
<b>M</b>	Professional, scientific and technical activities
<b>N</b>	Administrative and support service activities
<b>O</b>	Public administration and defence; compulsory social security
<b>P</b>	Education
<b>Q</b>	Human health and social work activities
<b>R</b>	Arts, entertainment and recreation
<b>S</b>	Other service activities
<b>T</b>	Activities of households as employers; undifferentiated goods- and services- producing activities of households for own use
<b>U</b>	Activities of extra-territorial organisations and bodies

<sup>1)</sup> Pursuant to the Regulation on the Classification of Economic Activities of Republika Srpska ("Official Gazette of Republika Srpska", No. 8/14).

# LITTLE SCHOOL OF STATISTICS

In the end, dear readers, we wish to provide you in this book with at least some statistical concepts you might not know, while knowing these could be useful.

## CONCEPTS

**Statistics:** Statistics is a science that deals with the collection, analysis and interpretation of data on variable phenomena, based on the probability theory.

**Statistical set:** Statistical set (basic set or population) is a set of all elements on which a certain variable phenomenon is manifested and statistically observed.

**Characteristic:** Properties based on which units within a statistical set differ from one another and which are subject to a statistical survey are called characteristics (variables). Various forms in which one characteristic may occur are called **modalities** or **values** of this characteristic.

**Statistical sample:** Statistical sample is a part of a statistical set. Based on its characteristics we make statistical conclusions about relevant characteristics of the population the sample was selected from.

**Representative sample:** A sample is representative if its characteristics faithfully reflect characteristics of the statistical set the sample was selected from.

**Statistical census:** Statistical census covers all units of a set at a specific moment called **critical moment**.

**Statistical series:** Statistical series are sequences of data arranged by values of characteristics or chronologically. If they are arranged by characteristics they represent **structural series**; if they are arranged chronologically they represent **time series**.

**Arithmetic mean:** Arithmetic mean (or mean) is mean value most commonly used in practice. It is often called **average**. It represents the sum of values of an observed characteristic divided by the number of the values.

**Geometric mean:** Geometric mean represents a measure of the central tendency that compensates proportional changes observed between data in the observed series. Values of characteristics are multiplied in succession and then the root of the total product is taken, with an exponent which is equal to the number of observed units.

# LITTLE SCHOOL OF STATISTICS

**Median:** Median is the value of a characteristic that is in the middle of a series whose data are arranged by size. It separates a data series into two equal parts (50% of units is lower than the median, while 50% is higher, in terms of characteristic value).

**Variance:** Variance shows the average squared deviation of all data from their arithmetic mean.

**Standard deviation:** Standard deviation represents the average deviation of all individual data from their arithmetic mean. Standard deviation may be calculated directly from variance, as a positive value of the squared root of variance.

**Indices:** Indices are relative numbers that indicate the ratio between levels of one or more occurrences in the current (reporting) period in comparison with the base period. They are usually expressed as percentages.

**Current period:** Current period (year, quarter, month, etc.) is a period in which the level of occurrence is observed, while the period with which this level is compared is called **base period** or **base**.

**Average growth rate:** Average growth rate (geometric growth rate) is the rate at which an occurrence increases or decreases during the period covered by the time series.

**Time series:** Time series are sequences of numerical data on an occurrence, arranged chronologically in successive and equal intervals.

**Trend:** Trend (secular tendency) is a developmental tendency of an occurrence within the observed period.

**Seasonal adjustment:** Seasonal adjustment is a process through which seasonal effects are eliminated from original data in a time series. In the multiplicative model, this is accomplished by dividing the original data by seasonal indices and multiplying by 100.
