### **Annual Farm Survey**

In the period between 1 and 15 December 2020, the Republika Srpska Institute of Statistics is carrying out the "Annual Farm Survey".

In the territory of Republika Srpska, the Survey will cover a total of 7,186 family farms, of which 6,756 are family farms and 430 are legal entities and entrepreneurs' farms.

In accordance with the definitions laid down in the current EU regulations and the methodological instructions and recommendations of Eurostat, this statistical survey will serve to collect data on the areas and realised production of crops, vegetables, fruit and grape, sowing plans for the following year, number of livestock and livestock production, slaughter of livestock in the farm, production and use of milk in the farm, labour force, and the value and area of leased agricultural land.

The interviews will be conducted by authorised enumerators of the Institute. The data on households collected through the survey are confidential and will be used for statistical purposes only, in accordance with the Law on Statistics of Republika Srpska ("Official Gazette of Republika Srpska", No 85/03).

Please note that the interviewers will apply the measures recommended in the Conclusion of the Republika Srpska Headquarters for Emergency Situations and the recommendations of the Public Health Institute of Republika Srpska in order to prevent the spread of the coronavirus. These imply conducting interviews outside the households, mandatory protective masks worn by both interviewers and respondents, and two-metre physical distance during interviews.

We are kindly asking the population to participate in the survey and help in the implementation of this activity, thus contributing to the success of future statistical surveys.
